

Sub heading: Causes of unemployment.

Topic Sentence One of the major causes of unemployment in Pakistan is lack of quality education.

Exp. Sent. The education system of Pakistan is old fashioned in terms of teaching methods and courses offered by different educational institutions. The current educational system is lacking in developing skills required for new and challenging jobs which leads them to failure to hunt an attractive job. This rate is increasing day by day.

Evidence Pakistani education system equip students with knowledge only and not with the proper skills. (Qasim Haidar Rizvi, September, 2021).

Concl. Sentence Thus, lack of quality education results in unemployment in Pakistan.

Effects of unemployment

To Sent Lack of quality education can have significant effects on mental health.

Exp. Sent Due to lack in skills, students are facing mental issues like anxiety and stress.

example The high expectations of parents to have a good job with attractive salary is leading them to anxiety. parents expectations are due to their investments on their studies/education. Also, In some cases he/she is the only source of livelihood. These factors cause societal pressure, anxiety, and stress in less skilled students which may lead to ^{even} suicidal attempts in some cases.

Evidence Low education linked and resulted in a lack of sense of control, resilience and frequent exposure to hassles (Neimeyer, 2020).

Concluding Sentence In this way, lack of quality in education leads to ~~depress~~ anxiety and stress in less skilled students.

Remedies to reduce unemployment

To Sentence The adverse effects of unemployment can be minimised by bringing changes in educational system of Pakistan.

Exp. Sent The negative effects of unemployment can be reduced by introducing E. education, vocational and technical education in current educational system.

example The introduction of E education is compulsory because skills are focused in this education. After attending E education, vocational and technical education, students can easily get a job. In case the job is not available then these students even start their own business or get self employed.

Evidence Ridzuan (December, 2022) shared the results of their research that E education and vocational education showed significant positive results in unemployment reduction.

Conclusion Thus, vocational, technical and E education can reduce unemployment effects.
