

DR Asif Khan

Neglect of enhancing intellectual ability in our education system.

Date:

Attention grabber	"Education is not the filling of a pail, but the lighting of fire" (William Butler) This means that education is not merely gaining knowledge but, it is also igniting one's desire and ability for intellectual growth.
Connecting sentence	Pakistan's education system has little room for intellectual growth.
Reflection of outline	This is due to our lack of research culture and outdated curriculum. Our government is paying no attention towards the education sector. Education system in Pakistan do not promote critical thinking and has un-trained teacher's. The situation is further exacerbated by exam's wholly based on memorization which hamper's intellectual growth. As a result of these factors Pakistan is producing unskilled graduates which have no research capabilities leading them

towards unemployment.

Moreover, these graduates are not innovative causing reliance on foreign technologies.

However, intellectual ability in our education system can be enhanced by updating the national curriculum and proper training of the teachers. Similarly schools should promote research and critical thinking. Most importantly government should make policies to enhance the intellectual ability in the youth.

Concluding Sentence

~~Thesis statement~~

In a nutshell, Pakistan's education system has neglected enhancing intellectual ability in the students, having grave consequences. However, if joint efforts are made such consequences can be averted.
