

M. Sohail Zahid

Topic: Neglect of enhancing Intellectual ability in our education system.

Intro- Paragraph

① Attention Grabber (Hook)

Although, the proverbial boy named Ali, used to do ~~to~~ all the works using his Intellectual abilities. One day, when all the village people got failed to recommend a solution for a problem. Ali thought to analyze the problems from all possible angles. He proposed an effective and understandable solution after keeping in view all required data and Information, and it worked very well. This shows how Important the critical thinking is to solve any problem.

Connecting sentence

Like those villagers, Pakistan has also been neglecting the intellectual abilities in its education system, despite having the great youth bulge.

Reflection

Gist of the outline.

The lack of feeling of responsibility in Governmental institutions and the fear in public of learning things in new ways are the main reasons of this negligence. Also the education system is dominated by class system producing low quality minds, critical thinkers. Owing to these factors, the problem of

unemployment surges due to lack of creativity in Individuals and social crime rate arises due to economic Inequality. However, Importance of education should be highlighted among people at both Individual and collective levels. Class system should be removed - Teachers are the fundamental entity in an education system.

So, they should be trained and scrutinized academically before giving them the charge of a classroom.

Concerned Institutions should minimize economic frustration among educators through increments in their salaries.

Concluding :- Negligence is being faced by our education system for enhancing Intellectual ability. Owing to this neglect, certain

students and graduates are facing certain Issues after getting their degrees. However, by applying stern measures, more attention can be diverted to education system to enhance intellectual ability in it.
