1 - Introduction
2. Crunch Paragraph

Outline.

Khushan.

Topic: Has employment increased or decreased in the cyber age.

Thesis (decreased)	Antithesis	Synthesis
a) Technology reduced human intervention by doing work in less time.	Data shows cyber workforce demand is increased.	Impact of technology is not uniform across all sectors.
b) Low skilled jobs have experienced decline. like typist, postmen.	High skill employment has been on rise like IT experts, data scientists.	Machines give more output.
c) Lack of digital skills and access decrease opportunities of employment.	The demand of digital Marketing and content Creators is also increasing.	Gout is not taking initiatives to give trainings and skills to unskilled people.
d) AI and gadgets reduce human employment.	Exponential growth of hardware industry to meet demands.	Knowledge of AI and gadgets help them to get employment.
e) Companies replace men with machines.	Promotion of e-learning platforms and more opportunities to the cusponst. does not counter Thesis point.	Lack of technological access for all
