The ascending potency of hybrid warfare being foisted on the state of Pakistan is adding to the security woes of the country? Elaborate with Examples.

Security

Security mean being safe or secure.

Pakistan's national security mean only the security of its citizens.

Although Pakistan is facing different security threats at national level. These threats includes Traditional and non-traditional security threats.

But will

Security Threats:

↳ Traditional Security threats.

↳ Non-Traditional Security threats

⇒ **HYBRID WARFARE** / Non-traditional Security threats

Non traditional security threats include

all threats excepts border conflicts or involving militancy **use** power/attack.

Topic is about hybrid warfare

NON STATE ACTORS:-

Non state actors are
- threat to security of our country. As
our dependency due to huge debt depends
on different world organizations. Our global
positioning depend on our policies but policies
depends on these organizations decision.

For E.g.:-

IMF, World Bank

As we have to take loan by every government
to fulfill our country need. IMF always
gives us new conditions like personal prices
taxes etc. which intuitions towards inflation
but as well as threat to our security.

As inflation increase will lead to poverty,
unemployment, more crimes and hence
result internal threat to our country
stability and peace.

Terrorism:-

Our country is facing more terrorism and its hazards than any other which in result's effects our country's security.

As Afghan refugees, Taliban and other

Banned legal teams as AL-QAEDA, TTP are working against Pakistan. These are

great threat that ~~are~~ anytime, anywhere they can attack resulting in human as well as economical loss.

Environmental Effects:-

Environment is caused by different factors and its effect our country security differently.

⇒ As environment change, un-serial rains caused which leads to hazards of crops and in result food shortage. Food shortage leads to Drought. Hence it impact badly on security as security directly related to citizen, and loss of food will leads to human

⇒ Increase in temperature will affect health of human being badly.

Food shortage:-

Grammatical Spelling mistakes

Due to climate change temperature of earth increased. Which results in unweather heavy rains and loss of agricultural products and crops. This impacts human health from two dimensions on economy and health.

As crops lost result in food shortage will lead to drought and result in human loss.

2ndly as crops damaged due to unweather rains country fulfill its needs by importing from other countries will leads to inflation as well as un-employment.

State Actor's:-

Not hitting the countries borders but direct attack on its goals by lobbying has very adverse effect on country's stability | security.

Any country by lobbying hire its agents from state **not** which work for interests of other country leads to political instability which has badly affected country's economy.

PDMS replaced ~~top~~ the government by lobbying and results in political stability. Since our economy is not growing results in bad GDP growth.

Cyber security threats:-

Attacking a country's confidential data may lead to a big loss for a country.

Cyber threat is a big threat for any country. It can face any country if once access to its confidential data is made. This is a big threat for any country as its secret projects and its power turning projects are exposed in a different way.

The ascending potency of hybrid warfare being foisted on the state of Pakistan is adding to the security woes of the country. Explain

- 1- Introduction
- 2- Analysing the concept of hybrid warfare
 - a- Discuss different tools and forms
 - b- stress on cyber attacks
- 3- Security woes of Pakistan amid increasing potency of hybrid warfare
 - a- Increasing cyber attack- breaching the digital security
 - b- Data theft from FBR and other related institutions
 - c- Stealing confidential information from Monetary institutions- NBP
 - d- India's clandestine cross border activities in Pakistan- discuss with case study
 - e- Misleading reports and allegations of associating Kashmir efforts with extremism
 - f- Externally provoked identity conflicts in Balochistan and KPK
 - g- US-India strategic partnership- diplomatic isolation of Pakistan and placement on Grey list
 - h- Controversy of Israeli-made Pegasus spyware program

4- How Pakistan is tackling and dealing with this new wave of hybrid warfare
Discuss with special reference to Pakistan
China collaboration

5- Way forward:
3-4 points

6- Conclusion

Water WAR.

as india is doing without attacking our border
 open's its door's and in rainy season
 its best to harm pakista as
 it is possible. It has many
 effects like:-

Evidence
even

with
condition?

- ⇒ Danger of Flood.
- ⇒ Deficit of Health care facilities
- ⇒ Emergency need of shelter
- ⇒ Danger of Drought by lossing crops.

All these hazards directly relate to economic growth of country
