

Wrong is wrong even everyone is doing it; right is right even when no one is doing it.

### 1. Introduction

This world is a test for humans where everybody rushes to fulfill their desires by choosing wrong path, but wrong cannot be considered right even if it is prevalent everywhere and there is no alternative for right. However, people can get to the right track by following some steps.

There are no suggestions in abstract essays

Instead of this explore the concept of objective morality

### 2. Attraction in doing wrong and running away from righteousness.

3. How people are doing wrong things instead of opting for a right path.

a) Child labour is wrong even it is prevalent because of poverty.

In abstract essays don't start the discussion directly from states and societies. Start from individuals

b) Democratic state ensures prosperity for everyone; even it is not prevalent everywhere.

Democracy is the prevalent form of government

- c) People are much addicted in class difference that they consider it right; instead it is wrong.   
 It is not something morally wrong nor right.
- d) Criminals think that they have right to snatch other peoples rights, but it is wrong.   
 Criminals are primarily perceived as morally wrong.
- e) Countries are engaged in clashes and wars; even peaceful environment is the right of every citizen.   
 You need to select arguments (wrongs) that are prevalent in the world.
- f) Transparency and accountability is imperative for prosperity; even people consider it attack to their privacy.   
 Separate right and wrongs in separate main headings.
- g) Charity and circulation of wealth is good even to nobody considers it as they have an excuse of poverty.   
 very few practice it.
- h) Cultural values give people respect in a society; but everyone considers them backwardness.
- i) To speak in the favour of oppressed country is right but every country make foreign policy according to its interest.

j) Giving rights to every individual is obligatory for everyone ~~X~~ but nobody follows it.

k) Using technology for a destructive purpose is wrong, but sometimes it is totally ignored.

4) way forward: Promote right things and ~~X~~ discourage people on doing wrong

No way forward in abstract essay

a) Ensures the implementation of rules and laws.

What about secular societies or societies that practice some other religion?

b) Adhere to Islamic principles of justice

c) Promote education in a society.

5) Conclusion

Does not properly address the topic.

All sorts of points are merged together.

Does not look at the topic from multiple perspectives

This world is a test for humans & where everybody rushes to fulfil their desires by choosing wrong path, but wrong cannot be considered <sup>ed</sup> right even <sup>if</sup> it is prevalent ~~to~~ everywhere and there

is no alternative for right.

However, people can get to the right track by following some steps. There is a long line of traffic because road is blocked

and the reason is that a political leader's going to cross this path. Meanwhile, an ambulance is also stuck in a path and

finding its way to save the life of a person. Driving special advantage to rich people is very common in a society, but everybody comes in this world

with equal rights. So, the right track is often ignored by people as they resorted to follow

wrong path. Many ill practices are very common in this world, but the truth is that

they remain considered wrong; no matter they are toppled with right.

Does not fall under the category of everyone is doing it

No gist of outline

The topic is not about considered wrong. The topic is about morality being free of social influence

Start by establishing the argument, not by giving the reason behind it.

Child labour is very  
common as the inflation goes  
high. Poor parents find difficulty  
in earning as much as to  
fulfill their stomach. They send  
their child to earn for themselves

Sentence structure, expression

This practice is wrong because  
every children has his right  
to get education and to enjoy  
his childhood. Looking into the  
society, every other girl is doing  
house jobs. Many girls are raped  
and killed every single day. Hence,  
sending child<sup>ren</sup> for child labour  
is wrong and giving them their  
rights at home is obligatory for  
their parents

No structure.  
 No example.  
 No data that suggests how prevalent it is. No reference for its validation

Class difference is  
much considered in a society ever  
What does that have to do with religion? Class difference is part of the economic system  
Also, if you want to discuss religion, social classes existed even in Muslim state of Makkah and  
Madina  
in the Muslim countries. Class  
difference is against the prosperity

Refern

of a country. <sup>Reference?</sup> Many distinctions are present in the societies i.e. poor and rich, black and white, male and female. <sup>These are not class differences</sup> However, prosperity comes when everybody <sup>Sentence structure</sup> treats equally. In history, many wars and revolutions emerge as people do not <sup>be</sup> treated equally in a society. <sup>Irrelevant to the argument</sup> French revolution comes when poor people have to pay more taxes as they are poor. Hence, it is right to give everybody equal opportunities, but mostly ignored.

Democratic state ensures a good state even it is in poor health everywhere in this world. Many people for centuries fight for democracy and they are against theocracy. However, countries which declare themselves as democratic state are not

democratic in a true sense.

For example, Pakistan is a democratic state though its people are still fighting for democracy. Democracy is in a poor ~~even~~ condition whether it is administrative, judiciary or parliamentary system. However, fully democratic state is good for a country even nobody follows it completely.

Irrelevant to the argument

Many people find the way out of poverty in the form of committing crimes. Crimes in every condition is wrong even people consider it right in poverty. Crime rate is increasing day-by-day and many criminals resort to killing, snatching purses, hacking. However, it is wrong

Irrelevant illogical argument

whether it is committed by rich or poor. Holy Prophet said, "if Fatima committed theft, I will order to cut her hands too." However, crime is crime no matter it is mixed with necessity.

Internationally, many countries are engaged in war and clashes. They have an <sup>for</sup> excuse of their survival, and to desire to insert their hegemony as every other country is doing it. However, war and clashes come as a result in endless oppression. For example, there is a war between Russia and Ukraine. Russia is a growing power and wants to control weak states. Meanwhile, many poor people are becoming more

Again Irrelevant to argument  
You can argue this from the perspective of History. For example War is the only thing that has remained present in every civilisation. Even modern civilisation is still waging wars though the means and patterns have changed. However, the prevalence of war across time does not make it a moral venture. Despite the reason, it leads to oppression and massacre of millions. As stated by Alber einstein, "war is the negation of morality." Hence, the prevalence of war does not make it right

poor because of different sanctions imposed on Russia and Ukrainians they are the major cheap oil exporters. Hence, it is wrong to engage in wars even every country considers it right for their personal advantage.

Transparency and accountability is imperative for prosperity; even people consider it attack to their privacy. In this world, it is a common practice to ask questions from poor people: if they get some money, and rich people have freedom to do corruption. People hesitates to put pressure on rich people. Many leaders and rulers run away from punishment and to be accountable for their

adv Islam teaches transparency and accountability for every single act and saying. For example, Umar (R.A) was addressing to people and a woman appears and negate him. Instead of running from<sup>away</sup> him, he admits his mistake. Hence, transparency and accountability is right, even nobody is applying it in their country or society.

Charity and circulation of wealth is good even nobody considers it as they have an excuse of poverty. Circulation of wealth is a right way because poverty anywhere is a threat to prosperity everywhere. However, many people and state ignore it fully and resources are enjoyed by only limited people.

Everyone considers it good. Whether they practice or not is a separate matter.

For example, <sup>Lower</sup> Shangha is a city of Balochistan where majority is coalminers, and in the east

Irrelevant example.  
This does not prove that most states shun charity.

to prosperity in the whole province. Hence, charity and circulation of wealth is good for a prosperous state; even if nobody admits it.

Very vague aspect. Cultural values are not always something good/right. Patriarchy is a culture of most, Wani and Sati are cultural practices, Dowry is part of culture, Female Infanticide is a cultural value at places.

Cultural values give people respect in a society; but everyone considers them to be backwardness. Cultural values ensure dignity of elders, females and love for children. However, many modern people are claiming their cultural values as banal conceptions. For example, children cannot bear their parents in old age and find ways to leave them. Hence, cultural values are good for a society;

even many people in modern world find it ridiculous.

Many countries leave the right path of siding with oppressed side and make their foreign policies according to their interests. However, speaking in the favour of oppressed is right, but many countries ignored it as they have threat to their own prosperity. For example, Kashmir issue is still alive as Pakistan is a weak country as compared to India. Pakistan lost its favour in international forum as trading with India is an interest of many date. Hence, it is right to speak for an oppressed one, even if everybody sideline it for their personal gains.

Irrelevant argument

No argument in the topic sentence

Everybody has an equal right of opportunities. Many people are deprived from their legal rights because they are from backward areas. However, it is good for a state to ensure equal opportunities for everybody. Many countries are lacking in this area. For example, according to the act of 25-A every children from five to sixteen age have right of free education. But 200 million children are out of school. Hence, it is good for a country to ensure the rights of every citizen; even it is not followed everywhere.

Does not prove the point you are trying to make. Example does not cover most

The use of technology for a destructive purpose

is wrong but it is ignored in many circumstances.

It is wrong to use technology for making nuclear weapons, and it can be used for many peaceful outcomes.

Many people in this modern world neglect the right use of technology which is wrong for everyone. For

example, many hackers leak the privacy of many individuals or countries which leads to despair and destruction. Hence, it is

right to use technology for peaceful purpose & instead of using it for wrong purpose.

To counter the situation, it is necessary to abide by the laws and regulations set ~~a~~ by ~~state~~ or international

example?

organisations. Laws are always useful in bringing justice and stopping the oppression, anywhere in this world. Many international forums discourage the ill practices in this world. But it is time to implement these laws as well. For example, according to UN charter every country has a right of national integrity and sovereignty. So, these such laws should be implemented in this world.

Adhering to Islamic principles can eradicate many ill practices from this world. Islam is a complete code of life which ensures the best way of living. So, its teachings of Islam should be promoted in this world.

For example, its judicial system should be implemented which will remove many ~~was~~ wrong doings. As Islam says, "hand for hand, head for head and foot for foot" so, these judicial practices will ~~is~~ instil fear in people, and they will avoid many wrong doings.

Education should be promoted in this world.

There is a need of promoting education severely. People from backward areas do not know their rights and obligations as they have not even primary education. However, education brings awareness in people which brings awareness in the whole world. It is rightly said, "if you live long, educate your children". Hence education is necessary for making distinction in right and wrong.

In a nutshell, wrong <sup>expression</sup> cannot be altered to right; right cannot be avoided <sup>Not the proper word here</sup> by mixing it with wrong. However, people ~~are~~ the wrong is wrong, no matter if the whole world is doing it.

or the rich and prestigious people are doing it. Moreover, Many people are doing wrong things at many different levels, but they are still wrong in doing that. Moreover, right is right, no matter how hard it is to abide by <sup>moving to</sup> the right things path. Hence, these wrong doings can be removed from this world by acknowledging the right path. Certain ~~to~~ little steps are necessary to create the big differences

Very general, does not recap the whole essay.
