

Topic: Has employment increased or decreased in the Cyber Age?

Turhan

Introduction Paragraph Structure (blank form)

Attention Grabber (Hook)  
When the steam boat was first built in what is now Germany, it caused great alarm to the German shipping guilds. They saw it as a threat to their employment and means of living. The guilds destroyed the first prototype. The German states, however, adopted the steam shipping later on. Once adopted, maritime shipping actually increased due to this new technology.

Connecting Sentence  
(Connect your hook with the reflection of the outline) New technologies are always viewed with suspicion

Reflection of the outline  
at first. Upon entering the cyber age the world witnessed its labour markets change. Contrary to popular belief, cyber technologies have actually increased employment. The minor costs of changes in labour market can be minimized through training and education. The new cyber age has greatly increased employment and employment opportunities. Cyber technologies have created a whole new set of jobs and have allowed people to work remotely. People can constantly enhance and update their work skills due to the online learning platforms. Information Flow has been increased to phenomenal levels allowing people to not only have a better knowledge of the

Thesis Statement

labour market but also <sup>learn about</sup> ~~seek~~ better employment opportunities. Tech start-ups have mushroomed around the globe as people have turned their homes into ~~business~~ work spaces. The opponents of cyber age employment argue that unemployment has actually increased, in the cyber age because on-site learning and employment are preferred, more jobs were lost due to cyber technologies and tech startups are not uniform. These ~~worries~~ pessimists find problems when none exist because attitudes ~~are~~ to learning and employment are changing, labour ~~is~~ being re-trained and tech start-ups <sup>have</sup> increased. ~~is~~ ~~regi~~
