*	d Economic Development:
	China as a mediator
	between both countries can bring economic,
	and technological integration resulting in national
	development. As Tran is already facing economic

g, largest Exporter of Energy:
Due to China's technological and economic rise, it requires huge amount of oil and gas. Middle - east is a region with huge entropy resources. China as a mediative can enhance the oil export of Saudi and lean and improve their economy.
h, Dawn of China's Superiority
China traveled to the path of economic, political and technological emperiority over the world and threatened united State's unipolarity The size of China has refluenced many geoeconomic as well as geopolitical events. Mediation through China can favour their alliance and affiliation to emerging global power.
i Hosthe Nature of United States.
United States has proven to
be a strict and hostile negotrator through many
 incidents such as sanctions of Ivan affiliation
to Israel and collaboration to Saudi-Arab
against the will of Iran. This mediation was Asspropositionate in contrast to equal negotration with China:
dispospostionate in constant to equal negotration
 with China.

iii CRITICAL ANAYSIS:

The China's involvement in political arena to negotiate between Sandi and Isan demonstrates the aims of China to become global political power after achieving global economic seperiority Furthermore oil sich sources in middle- Castern region demonstrates a favourable option for China to rely on and have powerful impact on oil producing countries or OPEC (obganization of petroleium exporting countries: Thus, it can be concluded and analysed that the power dynamics will be changed in global arena if China proved favourable option for negotiation in globale- east.
