

# Youth bulge in Pakistan: an asset or a liability

## 1) Introduction:

### a) Youth bulge

→ The balance between advantages and drawbacks of Youth bulge will shape Pakistan's future trajectory. Youth bulge in Pakistan embodies the potential for economic growth and innovation, but also presents the challenge of managing unemployment and strained resources.

The topic is argumentative topic select a stance.

Does not address the topic. Use keywords of the topic.  
→ Crucial Paragraph!

2) The Asset perspective: Properly phrase your main headings.  
This is formal academic.

A) Potential Advantages of Youthful Population: redundant heading

Population: redundant heading

a) Demographic dividend and economic growth

b) Innovation and entrepreneurship elaborate. Under perspective

c) Potential For building a skilled workforce overlapping points.

All of these are generic and vague. and point towards economic growth.

Properly phrase the argument

3) The liability perspective:

a) Unemployment and underemployment

write your subheadings  
as phrases or  
sentences.

b) Strain on public services like education and healthcare

c) Political and social instability

two separate arguments

Does not establish the domain of the topic.

4) Education and skill development:

which direction  
are you moving to

a) Education system of Pakistan

b) Challenges in providing quality education and vocational training

c) Potential for improvement in education system

Irrelevant

5) Economic factors:

a) Relationship between Youth bulge and economic growth

Specify the relationship in your point-

b) Policies that can leverage Youth population to boost economy

c) Importance of Job creation and labour market reforms

Involve each heading  
addresses separate issues  
coherence b/w them.

d) Conclusion

Incoherent and unclear outline  
does not address the asset and liability aspect  
properly

The urge to reproduce is one of the strongest human urges.

To pass on one's genes is an inherent motivation for all species,

including human beings. According to No Refrance

And evidence is  
introduction

United Nations Fund for Population it took humans millions of years to

reach population of 1 billion, whereas

it only took another 200 years for

human population to reach 7 billion.

Pakistan is the 5th largest population

holder in the world, the balance

between advantage and drawbacks

of Youth bulge will shape Pakistan's

future trajectory. Youth bulge in Subsahara

the topic

Pakistan embodies the potential for

economic growth and innovation, but

also presents the challenge of managing

unemployment and strained resources. For

example according to the Pakistan economic

survey, in fiscal year 2018-2019 Do not write points in the

agriculture saw only 0.8% growth

while population growth was 2.4%

Pakistan already being a food

insecure country this population growth

could further alleviate Pakistan's food

insecurity problem However, few

people are of the view that

high population is useful as it

can lead to economic growth as

useful labour. Labour is unproductive

in itself unless it is skilled and

For skilled labour capital and

education are required.

Transition -> establish what

you are offering -> In amount of liability

Skilled labour can serve as

our demographic dividend as it can

result in economic growth. As

this skilled labour can be exported

to other countries and also work

in Pakistan's industry and add to substantive

The workforce, Labour which is

exported will send remittances to

Pakistan which can in turn

change current account deficit to

No Inflation?

No examples?

Unless what you

claim it. Whether

you are offering

can serve as

substantive

turn

deficit

current account surplus.

Skilled labour force and an educated youth could <sup>discuss on what-work is most what could be.</sup> produce new innovative technologies which can be exported to the rest of the world and increase Pakistan's export and reduce the economic strains on Pakistan's economy which <sup>Example? like existing</sup> <sup>Belgium?</sup> due to fewer exports and excessive imports, furthermore this skilled labour can be used in new industries which are aimed at providing Import substitution products.

Paraphrase Structure

This youth bulge is <sup>lack of cohesion</sup> <sup>Previous paragraphs</sup> also <sup>all of an arrow</sup> a source of economic strain while this on the already collapsing <sup>is a liability. Your language</sup> <sup>class not wrong</sup> <sup>that.</sup> economy of Pakistan as unemployment has risen in the last decade which in turn has forced the majority of Pakistan's <sup>Too many</sup> <sup>of</sup> <sup>Pakistan's</sup> <sup>instruments.</sup>

disturb

population to fall below the poverty line as the whole world had come to a stand still in terms of economic growth since the onset of covid-19.

This youth bulge also serves as an economic strain on public services such as education and healthcare. Pakistan is already

insufficient in numbers of medical service providers and educational institutes. This change in structure of

population in terms of youth means that more of the population will be needing these facilities for longer periods of time

as the youth is expected to live for longer periods of

time and Pakistan does not have such service providers. This argument is not only concerned about numbers of youth.

Not a suitable word.

No evidence?

That some youth can become

service providers

The argument

is not only concerned

about numbers of youth.

The increase in population in form of youth also gives rise to Political and social instability in Pakistan as <sup>Over long sentence</sup> YOUTH is being indoctrinated by different factions and their hyper-activeness often incites them to take radical actions against those who do not confirm to their own socio-political views. This in turn creates

<sup>substant</sup> security problems in the country which leads to more instability in the country which discourages foreign investors from investing in Pakistan.

IF the youth in Pakistan can be utilized as an asset <sup>on its own</sup> structure it requires an excellent education system which can impart in <sup>using phrase</sup> it both the knowledge and skill set to compete in the structure

extremely competitive workforce of <sup>substant</sup> the world but unfortunately the <sup>unstructured</sup> education system of Pakistan is <sup>no evidence</sup> not upto the mark as Pakistan's education system ranks on 50th position in the world.

It becomes a challenge for education system of Pakistan to provide quality education and vocational training to the youth of Pakistan and if this issue cannot be resolved more and more youth becomes dependent on the government of Pakistan to fulfill it's needs for survival <sup>PP</sup> which in turn causes the further collapse of already collapsing economy of Pakistan. <sup>inadequate and unstructured</sup> in order to improve the education system of Pakistan <sup>no evidence</sup> more capital is required for <sup>no evidence</sup> improving the education system

of Pakistan so that this youth bulge can be transformed into an asset of Pakistan.

Youth bulge and economy of a country have a direct relationship with each other; However,

this relationship is beneficial only when the youth of a country is educated and skilled enough to compete with the rest of the

world. Unless it is not skilled

just like any other commodity <sup>No structure</sup> a country possesses it <sup>No argument is</sup> will <sup>the paragraph</sup> turn into a liability for that country <sup>No evidence</sup>

Policies need to be made to leverage <sup>Sentence structure</sup> this Youth bulge

to boost economy of Pakistan.

This can be done in a number of ways such as Improving transfer channels for youth

so that it can go and work in developed countries through proper government channels and then send back the money it generates through government channels back to their families this will only happen when they get favourable currency exchange rates. such policies need to made and then implemented as soon as possible in order to utilize this youth buldge that Pakistan possesses.

No connectivity b/w the paragraphs.

→ Job creation opportunities should be made inside the country by doing industrialization on massive scale in the country. Industries should be established in areas of comparative advantage such as textile and also those industries need to be established which can serve as import substitution for those sectors in which Pakistan imports

In conclusion, the youth bulge in Pakistan stands at a critical crossroad as it embodies the potential for transforming the country into a developed country with a thriving economy ~~and~~ <sup>and continuous</sup> improvement but it is only possible when education sector of Pakistan is improved along with massive policy reforms to support the youth so it can effectively work towards improving the economy of Pakistan. According to the current scenario the Youth bulge is an en serving as <sup>No such state established through the end of</sup> liability for Pakistan's strained economy and in the future will be cause of further deterioration of Pakistan's resources as this youth will be dependent on the government to fulfill its own needs.
