Neglect of Enhancing Intellectual Development in our Education System Paulo Freire, in his book Pedagogy of the Oppressed (1968) writes: Education is suffering from narration sickness." In such a set-up, the Jeacher acts like a narrating subject and the student behaves like a listening object as the teacher fills' the Hook student with content of his narration. This indicates that the education system takes students' minds as mere vessels to be filled and not flames which must be kindled. An education system like this would soon realize that no great things can be achieved by minds which only echo.
(1968) writes: Education is suffering from narration sickness." In such a set-up, the Jeacher acts like a narrating subject and the student behaves like a listening object as the teacher 'fills' the Hook student with content of his narration. This indicales that the education system takes students' minds as mere vessels to be filled and not flames which must be kindled. An education system like this would soon realize that no great things can

Connecting This mirrors the state of education in four country
Sentence where intellectual growth is not merely reglected,
but also discouraged.
Potencial development has updely been neglocked
This narrative sichness in our education system
has taken hold because education has become
a business with excessive standardization.
Reflection The whole educational lipecycle relies on
of the redundant practices of assessing retention
Outline abilities, delivering monologues in classrooms, and
ignoring innate abilities of the students. More so,
this education system has turned a blind eye
to enriching students' mind, body, and soul
