

Subjective Part II SECTION - A.

Question 2.

Give a critical Analysis of Aristotle's classification of governments. How are these classification relevant in present day political system?

Introduction:

Aristotle was a Greek philosopher. He classified government with some advantages. There are several criticism on Aristotle's classification. However it can be use in modern times.

Aristotle's classification of state:

He classified government on the basis of quality and quantity. By term quantity he means numbers and the claims of mass of people in society. By term quality he means wealth, social position and education. He classified state into different types.

No of Rulers	Good form of government	Bad form of government
1	Monarchy	Tyranny
few	Aristocracy	Oligarchy
Many	Polity	Democracy

According to him good form of government is Monarchy, Aristocracy and Polity and best one is Polity and bad ones are Tyranny, Oligarchy and Democracy.

Critical Analysis:

-1

Ancient times:

Aristotle's classification was for ancient times and it applied on ancient times.

-2

Binary approach:

His classification was based on number and rulers. This approach fails to account for more complex modern political systems which operate as constitutional republics and democracies, involving many branches of law.

-3

Linear Hierarchy:

It assume a linear hierarchy of government in best form of government

is polity and least one is democracy. However, it ignores the positive impacts of democracy such as citizen participation etc.

Lack of social, economic & cultural context:

His philosophy lacks social, economic and cultural context which are the basic needs of government.

Incomplete classification:

Aristotle's classification overlook several forms of government beyond his categorization. He doesn't account for federalism or confederation.

Aristotle's Classification of Government in present Political System:

Aristotle's classification can provide a framework for analyzing and understanding political systems in modern politics.
