

General Knowledge. II

Ques

The statement posits that war in Ukraine will determine the continuation or decline of the Western-led global order.

- ① Geopolitical Shifts: The war in Ukraine has geopolitical implications as it involves a clash between Russia and Western powers. The outcome of the conflict may influence the perception of Western power. The outcome of the conflict may influence the perception of Western power and its ability to defend its interests. A decisive victory for Russia could embolden other countries with territorial ambitions, potentially challenging the existing global order.

②

Influence On Alliances:

The war in Ukraine tests the cohesion and effectiveness of Western alliances, such as ~~noto~~ NATO and EU member states. How these alliances respond and whether they can effectively deter further aggression could shape the perception of Western unity and the strength of the Western led global order.

③

Norms and Values:

The conflict in Ukraine raises questions about adherence to international norms and values such as territorial integrity, self-determination and respect for sovereignty.

④ Impact on Global Institution:

The conflict's resolution or continuation may affect the role and effectiveness of global institution, including the United Nation and regional organization. The ability of these institution to address the conflict and enforce international law may influence perception of the western-led global order.

⑤ Economic Implications:

The war in Ukraine has economic ramifications, including sanctions imposed on Russia and disruption to regional trade and stability. The economic consequences of the conflict could affect the global economic order and the power dynamics between Western and Non-Western Nation.

⑥. Soft Power and Public Opinion

The conflict management and outcome may shape public opinion about the Western-led global order. The ability to effectively convey a narrative promote Western values.

⑦. Multi-polar world :

The war in Ukraine take place in an evolving global landscape characterised by the rise of non-Western powers such as China. The conflict's impact on this multi-polar world may reshape power dynamics, challenging the dominance of the Western-led global order regardless of the outcomes.

In conclusion, while the war in Ukraine has significant

~~geopolitical~~ geopolitical implication, it is just one component of a complex global landscape. The continuation or decline of the Western-led global order depends on various factors beyond the outcome of this conflict alone.

Qno 6.

Pakistan indeed faces challenges related to both floods and water scarcity. The factors responsible for these extreme situations and provide recommendations for addressing them:

① Monsoon Rains:

Pakistan experiences heavy monsoon rains, especially in the northern and central regions which can lead to excessive runoff and flooding.

2) Poor Infrastructure :

Inadequate drainage system, outdated water management infrastructure and insufficient flood control measures contribute to the severity of floods.

3) Deforestation and Land Degradation :

Deforestation, particularly in hilly areas, reduces the natural absorption capacity of forest, leading to increased runoff during heavy rainfall.

4) River Indus :

The Indus River, which runs through Pakistan, is prone to high water levels and can cause devastating floods during peak monsoon season.

Recommendation for flood management:

① Improved Infrastructure:

Investing in modernized flood control infrastructure, including dams, embankments and drainage system, can help mitigate the impact of floods.

② Watershed Management:

Implementation of effective watershed management programs that focus on reforestation, afforestation and land conservation can enhance natural water retention capacity and reduce runoff.

③ Early Warning Systems:

Developing and implementing robust early warning system can

provide timely alerts to communities at risk enabling proactive evacuation and preparation measures

4) Flood plain Zoning:
Establishing and enforcing flood floodplain zoning regulations to limit human settlements in high-risk areas can minimize the vulnerability of communities to flood events -

Factors responsible for water scarcity:

- 1) Inefficient water management
- 2) Population growth

- (3) Climate Change
- (4) Agricultural Practices.

Recommendation for addressing water scarcity:

- (1) Water Conservation
- (2) Improved water Infrastructure
- (3) Integrated Water Resource Management -
- (4) Climate Change Adaptation
- (5) Public Awareness and Education
- (6) International Cooperation -

Ques 7

The US-India strategic partnership, while driven by various factor including geopolitical

interest, trade relations, does
- have implications for Pakistan.
