

Batch:- 54

Topic:-

Online Education has
Given more Opportunities
Than Challenges.

Outline:-

- A- Introduction.
- B- Education.
- C- Online education.
- D- Need for online Education.
- E- Sources of online education.
- F- Best time to get online education.
- G- Opportunities online education provides.
 - 1- Flexibility and Accessibility.
 - 2- Cost-effective
 - 3- More focus in Isolation.
 - 4- Wide range of courses and programs.
 - 5- Personalized learning experience.
 - 6- Global learning and collaboration.
 - 7- Skill development for Digital age.
 - 8- Life-long learning opportunities.
- ~~H- Challenges~~
- H- Challenges given by Online Education.
- I- Recommendations to Improve online Education.
 - 1- Enhance Technical Infrastructure.

2- Encourage peer Interaction and collaboration.

3- Continuous Improvement and Feedback.

4- Professional development for Instructors.

J- Conclusion.

When we talk about Education, ~~one~~ The Things come into mind are infrastructure, classrooms, social interaction of students and a building. But when we think about online education, an un-orthodox way of teaching comes with mere a laptop and a network connection. Online education has given more opportunities than challenges. Opportunities like accessibility and flexibility, Cost-effective, skill development in Digital age, and personalised learning experience are common.

According to Abraham
Lincoln;

“ Education is not to
teach people what they
do not know, Education
is to teach people to
behave as they do not
behave.”

In the digital and
globalized world, people want to
get education without any
restrictions of time, place and
social standards. Before corona virus
pandemic, this digital learning
revolution was in its starting
phase. When COVID-19 ^xarised ^xarouse,
this online learning revolution came
and took ~~the~~ ^xthe entire world
under its shade. With the need
of the hour, ~~Everyone~~ ^xIt was
must for everyone to get
online education while living in
quarantine at home.

After COVID-19 hit the
planet, there was a strong need
generated due to its contagious
nature. Everybody had to be in

Quarantine or in social Isolation. Then, a strong need was felt in the field of education ~~of~~ to teach students while putting them in social Isolation. In the result, the total orthodox way of learning was shifted to an innovative way of teaching. For Instance, Zoom classes are arranged now for distant students and they can now learn at the ease of time and place.

Students or learners use different sources for online learning available to them. Certain reliable sources are available online, such as, Coursera, Zoom, Harvard online learning, and skill-share etc. For Instance, students use zoom app for live online lectures as it is more reliable for fast, safe and secure connection. It depends on a student that which app fulfills his or her needs.

The answer to what is the best time to get online education is that there is no

fixed time to get digital education. One can easily get access to the source and start learning anytime. Online Education gives an individual, a chronological flexibility. ~~Everybody can~~ For Instance, An Individual in every~~any~~ corner of world can get education online without any physical presence and any time restrictions.

He can learn Independently without being suppressed by any external force.

Online education has given ^{certain} opportunities. One can easily have flexibility and accessibility every time. Time management is a most challenging task for every student. But online learning has minimised such challenges and made a man independent to get access anytime without any time and place restrictions. For Instance, Students who are from backward areas and under-developed villages can easily get access to e-learning without spending more money in

in hostel expenditures and universities. In a developing country like Pakistan, According to United Nations Women.org, Gender Inequality is at its worst case. So, there online education plays a pivotal role in strengthening women and providing education to women while staying at home. This way, Women stay safe from harassment and bullying etc. For Instance, There are many cases of women in Pakistan who have taken advantage of online learning.

Online learning is cost effective. The reason is that, in physical education, students from other cities come to ~~metro cities~~ universities, spending high fares and hostel rents. Away from homes, that is very difficult especially for girls. Besides, They students have to pay tuition fee. Contrarily, Online learning is much cost-effective than orthodox way of learning. For Instance, 17 d

student studies at home. He saves his financial resources and saves himself from any other extra expenditure.

A person gives more focus in isolation rather than in a collective interaction.
