DATE: ___/___/___

Online Learning has become popular among institutions as it enables them to expand the reach and scale of their programs. Schools, universities, and colleges now offer more courses to large numbers of students and can do so at lower cost than they would with their traditional methods. On the other side this became also a advantage for the institutions as well to increase their revenue without increase their expenses, which is especially important during economic downturns.

The advancement in the technology became a flexibility and also played a crucial role in the adoption of online learning as well - Learning management systems and online platforms. LMS and online platforms provide a wide range of tools to enhance the working experience of the students, such as classes on Zoom apps, interactive whiteboards, screen sharing. These tools have made possible for the students to receive high quality education and comparing with the physical traditional education system this system is even more flexible and enjoyable for the students.

Today, in the post modern era for the world and especially for the students ~~by~~ studying from all around the world. Employees and also students in every community. Today employees and also securing certifications and their degree by sitting in their homes. The main reason of students from shifting from traditional setups to online platforms is due to convenience and flexibility it offers. The one of the most important platform helps students in accessing different course materials and attend the classes from everywhere they want as long as they have internet connection. This allows them to continue their education while also working and fulfilling their other responsibilities. Distance Learning can also be more cost efficient than traditional in person education, as it eliminates the need for commuting and other expenses. Distance Learning programs offer a wide variety of courses and programs, including those that are not available at traditional school and other institutions. Technology has played an important role in making students life easier and helps students to access and engage with more

material and exposed - This has made online education more interactive, engaging and effective.

Some students faced many issues when the Covid-19 arrived, all institutions of education were closed and students with the typical mindset and the student which were lacking exposed and access to technology have suffered a lot. In the past three to five years when the covid came, the education was totally digitalized and many student's mindset was unable to accept that. Their mindset was totally restricted with the face to face interaction with the education so due to these reasons they suffered a lot.

There was a big and most crucial challenge for the education faculties to motivate as well as discipline the student while teaching on education platforms. The combination of increased accessibility, cost effectiveness, flexibility and the need for the remote Learning has contributed a lot to the online Learning market.
