Online education has its great benefits in the

form of multiple online platforms
e.g Zoom, Duo and whatsapp.
In addition to this, online education
statistics report that online
learning courses reduce **90%**
energy consumption and improves
the team member productivity
upto **25% - 72%** of organizations
believe that using online learning
gives them a competitive
advantage. And in **2020**, **38%**
of the workforce upskilled in all
over the world, compared with **2019**.
In the contrast, every pic has
a blank side also. Similarly,
online education has some
challenges. And these challenges
have less capacity than
opportunities.

Online education
is important for those who
wants to continue their education
with their jobs as well as

distance learning provides easement to students as their time is saved by online education which protect them from travelling. As during the **Covid-19** pandemic online platforms play a key role for providing education.

During this pandemic online education provides the students, opportunities to save their time and to complete their degrees without any difficulty.

Online education provides different job opportunities to many skilled persons, who know the use of IT. almost 73 million ^{population} of the world is getting job by online education. Online education provides awareness about information technology which trained the people to earn their living confidently. Therefore, online learning

Platforms are beneficial for educated youth.

Literacy rate can be increased by online education because through online study knowledge spread in the every corner of the world. Specially rural areas can get advantages through this schematic process. Thus, this is a great opportunity for underdeveloped areas.

Through globalization online education has become one of the biggest source of dollar receiving machine. A country, which has good and skilled teacher, uses these teachers to improve their economy. and economy is one of the big cause of a state's stability. Thus, we ^{should} ensure the online learning in different

sectors.
