Don't enlist the opportunities in thesis statement

2) Online education has provided greater opportunities. (Thesis)

3) More opportunities provided by online education

   a) Access to wide range of courses and programs.

   b) Flexibility of learning environment.

   c) Cost-effectiveness of online education.

   d) Increased opportunities for career development.

   e) Opportunities to explore other cultures and enhanced collaboration through virtual discussions.

4) challenges of online education.
   a) widespread false websites offer
      free and paid courses (Anti-thesis)
   b) Lack of accountability and
      issue of self-discipline.
   c) lack of access to reliable
      internet and tech devices.
   d) limited opportunities for hands-on
      learning experiences
   e) online education is not
      suitable for all learners, and
      miss out the social aspect of
      traditional learning.

5) The opportunities of Online education
   outweigh the challenges. (Synthesis)
   a) Fraud and scam opportunities
      exists even in traditional learning
      structures.
   b) Online platforms ensures quality
      education in order to promote
      Positive reputation worldwide.
   c) IT devices are cheaper
      and innovation of 5g in
      devices.
   d) Online education is becoming
      increasingly recognized by
      employers.
   e) online education can be
      adapted to suit different

Learning Style.

6) Conclusion

Islam has revolutionaized [not suitable] the tribes of Arabs in the same way, online education has provided greater opportunities and revolutionaized the traditional learnings methods. Online education has become increasingly popular in recent years, especially with the rise of technology and internet. It has boomed the progress of every sector whether it is skill development, access to learning, employment etc. "**Online education is like a rising tide, it's going to lift all boat.**" This quote signifies the importance of Online education. That it is now a reality. It has benefitted every sector. It opened the door of opportunities for students, teachers, experts, buisness men etc. Flexibility, access to a wide range of courses and programms, virtual discussions has boosted the possibility of greater future through online [unstructured intro]

education. The race of having a
so sophisticated online educational platforms for people
has also improved the quality
education. It provided opportunity
not only just for basic
knowledge but also a for skill
improvement, technical knowledge
about particular field. Progress of a
country determine is also determined
by how much it has adopted
new technologies. and As adoption
of technology directly related
to new opportunities for people.
Thus, online education has provided
greater opportunities than challenges.

Online education is
also known as distant learning, is
the education where students and
teachers are not physically present
at school or learning centres.
It might be 100% virtual or
involve
here hybrid mode of learning.
Online education has provided
the opportunities not only for
the students of but also for the
people for of all ages. It has benefits
that has revolutionalized the
traditional patterns of education.
Thus, benefits outbalance the
challenges of online education.

Online education has provided access to widerange of courses and programs. Students can access courses from different institutions and universities. Students can choose programs that are not available in their local areas for example, ~~In~~ in Pakistan, online education has provided students with access to various universities abroad. Roots, Ivy and other institutes provide students with external law degree from various presitigious foreign institute. Thus, online education has provided access to courses that are not available in traditional classroom settings.

Flexibility of learning environment has overcome the obstacles of time constraints. Students can learn at their own pace and schedule. Students can balance work, family and other communities while studying. It is because they have access to material 24/7. as a lot of platforms and virtual universities have provide recorded lectures to their students. Thus, students can learn from anywhere in the world. Online courses Online learning is also cost-effective. ~~They~~ are generally less

no example

expensive than traditional classroom courses and students can avoid other expenses associated with traditional education such as text books. For instance, Universities provide students with online alg library research articles that not only give access to quality access
no example
but also save money. Thus, students can save money and avoid the cost of living in expensive cities.

Students can take courses that could to improve their skills and knowledge. Students can learn degrees that can lead to higher-paying jobs. There is no restraints for a specific background to get education or knowledge. Youtube, Ted talks, Vox and all others platforms provide people to improve their IT, Speaking and professional skills that helps them to progress in their professions. Thus, such learning platforms provide exceptional skills to secure high-paying jobs, and remain competitive in job markets. Online education allow students to explore new cultures. One can learn about the practices and traditions of other societies. Such experience also helps in

improving communication skills a through virtual discussion, Scholarships and financial aid in various countries helps ~~the~~ people to explore new cultures while sitting in their homes for instance, debates and discussions on zoom or google platforms has ~~but~~ enhanced learning from people across the world.

On the other hand, there are scam websites on the internet. Such websites offer paid and free courses in order to trap individuals for their interests. They provide free access to courses in order to get personal details or money from people. A proof of, Such websites are that they generally give one-click permission to open links. Phising links requires urgent request for users to respond. Thus, Students may encounter Phising links when applying for the access of courses.

Moreover, issues of accountability still persist in online education learning. Students may cheat from various sources on internet. Furthermore, there is issue of self-descipline in

no example

no example

Online learning platforms. According to National institute of health study on "the impact of cheating in online learning effectiveness" founds that 60% of students admitted to cheating during online exam most of the time. Thus, results showed that cheating is more easier in online courses.

Not only this, their is issue of reliable internet and tech devices. Especially, people in developing and less developed countries face this challenge. According to ITU (international telecommunication union) 2.9 billion are still offline. Thus, stats show that there are people that donot have access to internet and tech devices.

There are limited opportunities for hand-on learning experiences in online learning. Students cannot perform lab, infield research in this mode of learning. Professions such as mechanical engineering, medicine, still requires hand-on learning experience and practice. Hence, some profession requires field work

and practices.

Online education is not suitable for all learners and miss out the social aspect of traditional learning. Students have fewer opportunities to develop relationships and ot networks with other students. One might feel isolated and disconnected with other professionals and students. ~~This~~ Sense of connection completely lost especially due to £ poor internet connection. Hence, poor connection, lack of face to face connections is are major challenges posed by online education.

no example

Although online education like other mode of education has few challenges even then its opportunities outweigh the challenges. fraud and scam opportunities even exists in traditional learning structure. There are institutions that maintain higher cost for the courses and even then do not provide students with quality education. false promises of practical and completion of courses is are made for the sake of money. Common practice in various institute

Does not emphasise the opportunity

in order to get take is that bribery bribe, corruption is done for the seat. Thus, bribery and false commitments are also common practice in traditional learning platforms.

Furthermore, online platforms ensures quality education in a way that there is rating system. A bad rating can affect their institute, website not locally but across the word also. In order to promote their reputation they properly guide students through various virtuals method. For example, not only mentors provide student with the lectures practical knowledge is also given by professionals. According to US study, 48% of undergraduates and graduates felt like online learning was effective and proffered preferred online learning. Hence,

IT devices are much cheaper nowdays. Even in developing countries only few population does not posses mobiles or smart phones. China is producing cheaper IT more and product that has change the saves

of e-learning. Now, globally, almost 90% possess of cellular phones are smartphones according to banking cell study. Hence, this shows instead of buying books, registers one can buy mobile phone or laptop. That is way more cheaper than traditional education expense.

Online education is becoming increasingly recognized by employers. E-learning has provided people with various platforms to have + secure jobs according to their interest. Such examples include LinkedIn, Upworks, fiver etc that has expanded the opportunities for people. India exported more than 40%. Its IT has its services. It is all because of e-learning platforms.

In addition to this, online learning can be adapted to suit different learning styles. This helps the students to adopt to various new method of learning. For example visual learners can benefit from the use of video, images and diagrams which can help illustrate complex concept and ideas. Auditory learners can benefit

[margin note: no example]

from recorded lectures. Hence, by providing a range of interaction, online learning can be adopted to suit the needs of different learning styles and helps students to achieve their full potential.

In conclusion, Online learning provides more opportunities than challenges. It could provide greater access to courses, greater flexibility, connect with professors across the world and helps students to gain skills. Finally, online learning can help students to develop important skills, which are highly valued in today's job market. Overall, online learning provides student with more opportunities to grow, learn and succeed.

No discussion of challenges
