(red annotation: Sentence structure. Write shorter simpler sentences.)

(red annotation: Unstructured introduction.)

Thesis Statement:-

(red annotation: No separate heading for thesis statement. It is part of the introduction)

Despite the challenges of online education, such as lack of face to face interaction and potential of distraction it has provided more opportunities than challenges. Online education has increased accessibility to education, allowed for greater flexibility, and provided opportunity from Learn anywhere around the world.

(red annotation: Don't list challenges and opportunities in the thesis statement)

Online Learning has become popular among institutions as it enables them to expand the reach and scale of their programs. Schools, universities and colleges now offer more courses to large number of students and can do so at lower cost than they would with their traditional methods. On the other side this became also a advantage for the institutions as well to increase their revenue without increasing their expenses, which is especially important during economic turndowns.

The advancement in the technology became a flexibility and also played a crucial role in the adoption of online Learning as well. Learning management systems and online platforms. LMS and online platforms provid a wide rang of tools to enhance the working experience of the students, such as classes on Zoom apps, Interactive whiteboards, screen sharing. These tools have made possible for the students to recieve high quality education and comparing with the physical traditional education system this system is even more flexible and enjoyable for the students.

Today, in the post modern era for the world and especially for the students studying from all around the world. Employees and also students in every community. Today employees and also recieving certifications and their degree by sitting in their homes. The main reason of students from shifting to from traditional setups to online platforms is due to convenience and flexibility it offers. The one of the most important platform helps students in Accessing different course meterials and attend the classes from everywhere they want as long as they have Internet Connecti This allows them to continue their education while also working and fullfilling their other responsibili Distance Learning can also be more cost efficient than traditional in person education, as it eliminate the need for commuting and other expenses. Distance Learning programs offer a wide variety of courses and programs, including those that are not available at traditional school and other institutions. Technology has played and important role in making students life easier and helps studen to access and engage with more

Margin annotations (in red):
- Directly address the argument in the topic sentence
- Repetitive
- That is not the argument mentioned in the outline
- Access from everywhere and education while working are two different arguments
- Completely incoherent
- Paragraph structure, different arguments in a single paragraph

meterial and exposure. This has made online education more interactive, engaging and effective.

Some students faced many issues when the Covid-19 arrived, all institution of education were closed and students with the typical mindset and the student which were lacking exposure and access to technology have suffered alot. In In the past three to five years when the covid came the education was totally digitalized and many students mindset was unable to accept that. Their mindset was totally restricted with the face to face interaction with the education so due to these reasons they suffered alot.

These was a big and most crucial challenge for the education faculties to motivate as well as discipline the student while teaching on education platforms. The Combination of incresed accessibility, cost effectiveness, flexibility and the need to the remote Learning has contributed alot to the online Learning market.
