Question NO# 04

1) Introduction

The world has been facing global financial super cycle since last few years owing to covid-19 and Russia-Ukraine crises.

It has multiple impacts on developing countries like Pakistan such as increase in twin deficit and inflation in the country.

Therefore, Pakistan need a comprehensive plan to tackle these issues.

2) Understanding the key scenario of global financial super cycle: An overview

Global financial ^{cycle} ~~crises~~ ~~has~~ ~~has~~ escalated owing Russia-Ukraine war.

Oil and food prices sky-rocketed and Europe biggest economies faced

energy crises. As a result, global

economy growth ~~has~~ slow down from 4pc

in 2021 to 2pc in 2022, according to the world Bank.

3 ~~Implicit~~ Reasons for the global financial crises super cycle

3.1) Russia- Ukraine war

Russia- Ukraine war has escalated global economic crises which is already emerging owing to the after shocks of covid-19.

The Economist Intelligence Report 2022.

3.2) Saudi's vision of 2030: utilize oil revenue to fund its visionary projects

Besides this, Saudi's have escalated oil prices owing to generate more revenue for its vision 2030 projects.

According to the Fareed Zakaria, Saudi's are utilizing its oil revenue and that was the prime reason why Crown Prince Muhammad Bin (MBS) had refused Biden request to increase production during Mid term election in 2022.

3.3 Supply side constraints: Covid-19 after shock

After covid-19, the economies have started recovering, yet supply side constraints are still rampant.

3.4) Increasing global interest rate especially in developed nations.

According to W.B report 2023, countries across the globe are increasing interest rate to curb the growing inflation in their respective country.

3.5) Climate change: A key driver of natural disasters

Climate change has escalated food crises across the world. According to the FAO report 2022, more than 600 million people are facing acute hunger crises in the world.

4) Implications on Pakistan:-

4.1) Increase twin deficit: current and fiscal account deficit

Pakistan need 25 billion dollar to finance its loan in FY 23-24. Moreover, In FY 22-23, Pakistan ~~had~~ energy imports bill soared to 18 billion dollar (owing to higher oil prices) according to Economic survey of Pakistan 21-22 FY.

4.2) Growing debt to GDP ratio

Pakistan debt to GDP ratio has increased from 30% to 75% in the last decade. So, Pakistan is facing high debt to GDP ratio, according to PIDE report 2022.

4.3) Bugeoning inflation

Link with financial cycle
 Pakistan ^{has been} facing double digit-inflation since last decade. According to the Asian development financial performance report 2022.

4.4) Poor growth in manufacturing industries: import restrictions

According to the Pakistan Bureau of Statistics, large manufacturing industries performance was lowest during last nine months owing to import restrictions.

4.5) Increased political polarization in the country

Owing to economical crisis, political polarization in the country has increased. It will enhance intolerance in the country.

5) Policy options for Islamabad

5.1) Role of Pakistan as a mediator in Russia-Ukraine war

Pakistan should play a mediator role in Russia-Ukraine war. It has good relations with both countries. Pakistan should learn from the Turkey.

5.2) Introduced fiscal and structural reforms to overcome economic crisis

Ishrat Hussain in his book "Governing the Un Governable" emphasized that without implementing structural reforms, Pakistan can never get out from debt cycle.

5.3) Shift towards renewable energy to decrease import oil dependency

Pakistan should implement its "2019 renewable energy policy" in which it showed commitment that Pakistan should produce 30pc of its electricity from renewable sources.

5.4) Introduce innovative technology in agricultural sector to reduce food import bill.

Pakistan should introduce innovative technology in agricultural sector to reduce food import bill. Pakistan's food import bill rose to 9 billion dollars in FY22 according to the ~~FDI~~ PBS.

5.5) Increase climate diplomacy and add climate change in national curriculum:-

Pakistan should also strengthen its climate diplomacy and increase ~~an~~ climate awareness among youth. It will help Pakistan ~~to~~ in fight against climate.

6) Conclusions:-

To conclude, global ~~to~~ super cycle has been escalating since last few years owing to covid-19 and Russia-Ukraine war. It has multiple impacts on Pakistan and it ^{have to} should take bold measures to reduce the negative impacts of global super cycle on its economy.

Question No# 6

1) Introduction

Pakistan is facing dual challenge which are water scarcity and floods. Both these challenges have several seasons and ~~they~~ both posed serious challenges for the country.

However, if Pakistan implemented certain bold measures then this dual challenge can be addressed.

2) Conditions of floods and water scarcity in the country: An overview

Pakistan inherited irrigation system from British. English man created a large and complex irrigation system on the Indus river ~~which is~~ that system blocked the natural flow of Indus and diverted its flow through canals. Nowaday, this system is the major reason behind water scarcity and floods in the country. (Sindh irrigation minister Jam Khan Shoro)

Day: _____

Date: _____

3) Factors responsible for Floods.

3.1) Climate change: A major driver behind natural disaster

According to the IPCC report 2022, Pakistan has more than 71000 glaciers, from that 31000 ~~have~~ glaciers have ~~made~~ been converted into glacial lake owing to climate change

3.2) Complex or manmade disaster irrigation system in Pakistan.

Pakistan inherited irrigation system from British. Nowadays, this irrigation system has affected the natural flow of Indus Basin and responsible for floods in the country.

3.3) Inadequate storage facilities especially in lower region of the country.

Pakistan hold 30 days storage capacity, on the other hand, India and Bangladesh hold 90 and 100 days storage capacity, According to the world Bank.

4) Factors responsible for water scarcity

4.1) Climate change : intensify the glacial melting

Similarly, water scarcity is driven by the climate change. Pakistan is the home of world's biggest glaciers but these glaciers are melting at high speed owing to climate change.

4.2) Extensive use of water in agriculture

Pakistan utilize its water resources poorly, according to ADB report on Agriculture.

4.3) Lack of consensus among provinces for rational water utilization

Sindh and Punjab frequently fight over water issue. Both provinces claimed water stealing. So, lack of consensus among provinces is another major issue for water scarcity.

5) Policy options for Islamabad

5.1) Introduced a comprehensive climate resilience policy

Pakistan need a comprehensive resilience policy to counter the emerging threat of climate change. It should take climate as a serious matter. (Rafiq Zakria)

5.2) Established a supercharged separate board like National climate coordination to boost inter-provincial coordination and strengthen oversight over climate policy implementation

Pakistan should establish a separate high power committee on climate to look after the climate policies implementation and enhance inter-provincial coordination among provinces. According to the WFP report on "sustainable future and climate change".

5.3) Strengthen national disaster departments capacity

Pakistan should strengthen its national, provincial and especially district disaster management capacity. So it can effectively deal the climate driven national disasters.

5.4) Introduce innovative technology in Agriculture

Technology in Agriculture is a need of hour and Pakistan should develop water-resistant technology to preserve water.

5.5) Strengthen financing in irrigation sector.

According to the Tshrat Hussain, fees of water development authority charge for water delivery is insufficient.

It should be increase and finance irrigation sector is a need of hour.
