beneficial for women. But there are also some challenges created by online education like poor bad network and no worth of certificates of online courses. Distraction of social media is also a problem. But there is also solutions that make online education more attractive as technology is improving which solves network problem. Through e-learning you can get experience and your answers through different platform and it is equally benefitted the women.

write a concluding sentence to close the intro

The internet revolutionized the accessibility and delivery of education. In the 1990s, online education began to gain traction as universities and institutions started offering web-based courses and degree programs. Initially, online education faced skepticism and concerns about its effectiveness and credibility. However, advancement in technology, improved internet connectivity, and the development of Learning Management System (LMS) paved the way for more sophisticated online learning experiences. The COVID-19 pandemic

further accelerated the adoption and acceptance of online education. School closure and physical distancing measures in 2019 to 2020 has shifted the world to online education. Online Education comes with different merits and demerits.

Online education has proven to be immensely beneficial for distant students. Because it removes all geographical barriers and limitation and allowing everyone to get access to high quality of education from everywhere in the world. Its accessibility and flexibility enables students to get education while they doing jobs or business at same time. Students can access a vast collection of educational materials, including e-books, research paper, video lectures zoom lectures which enables them to explore various subject. Therefore, through online education students can acquire valuable

knowledge regardless of their physical location.

Online education has made international courses easily available to students regardless of their geographical location. Through online platforms, students can enroll in courses offered by prestigious universities from all around the world. This accessibility allow students to expand their knowledge and engage with diverse perspectives.

As one of most prestigious company, Google with its initiative, Google Certifications project give <sup>s</sup> Scholarships to Pakistani Students free of cost.

The availability of international courses open <sup>s</sup> new horizons for students, broadening their understanding and enhancing their capabilities.

Different platforms like YouTube are filled with a wealth of educational content in the form of lectures, tutorials, and educational challenges channels. Students can access a

diverse range of subjects and topics through these platforms, often free of charges. YouTube offers an extensive library of educational videos created by experts and educators from around the world. YouTube hosts a vast collection of educational content with over 500 hours of video uploaded every minute. By <sup>through these</sup> these platforms, students have opportunity to learn at your own pace and explore a variety of subjects.

example?

Online education eliminates all hurdles and barriers geographically removing border lines between countries. With the advancements in technology and the availability of high-speed internet connections, students from rural areas, remote regions, and even in different countries can now participate in virtual classes, interact with instructors, and access educational resources. This accessibility ensures that students

Repetition

have equally opportunity to receive a quality education. According to a report by the Babson Survey Group, in 2020, over 6.6 million students in the United States alone were enrolled in at least one online course. By transcending geographical boundaries, online education open doors to diverse learning experiences.

The evidence is not related to the argument discussed

Online education has proven to be particularly useful for women who face challenges in accessing educational institutes. Online education addresses this gender disparity by providing a flexible and accessible learning option for women who may be restricted by culture. Women can, now a day, get online education and also earn online which pave the way for her professional growth. A study by the World Bank found that online education can help increase female enrollment in higher education, with women accounting for 53% of learner in online courses. By offering a convenient

environment, online education empowers women to pursue their dreams of higher education.

Despite of so many benefits of online education, it also has many disadvantages like online education is not much beneficial for students living in rural areas due to bad <sup>poor</sup> network. The lack of reliable network infrastructure poses challenges for students in rural areas. Because of this issue students are ~~remained~~ deprived of pursuing their dreams. According to the Pakistan Telecommunication Authority Annual Report 2020, the internet penetration rate in Pakistan was approximately 47.70% as of December 2019. These statistics highlight the significant barrier that inadequate network connectivity poses for students in rural areas.

Despite the growing popularity and effectiveness of online courses, some companies

still do not give them due credit. Because practicle companies often value hands-on experience and learning. This lack of recognition can pose challenges for individuals who have obtained their education through online platforms. According to the Survey conducted by <sup>Society</sup> for Human Resources Management (SHRM), only 58% of employers view online degrees from accredited institutions as equally credible as traditional degrees. These statistics discourage the students to enroll themselves in any international online courses which give them no advantage but just waste of time and money.

One of the major hurdles in online education is the pervasive distraction caused by social media. Students start scrolling media instead of getting lectures or videos they want for educational purpose.
