

Question :- 6

Outline :-

- I- Introduction
- II- Prevailing social problems of Pakistan related to Poverty.
 - A- Unemployment
 - B- Illettracy
 - C- crime
 - D- low standards of life.
 - E- Health Issues.
- III- Prevailing social problems of Pakistan related to Education.
 - A- unemployment.
 - B- Illettracy.
 - C- Poverty.
 - D- Criminal activities.
 - E- societal Imbalance.
- IV- Strategies to deal with them.
 - A- Enhancing education standards.
 - B- Equal opportunities for business.
 - C- Investing more in manufact-uring sector
 - D- Fighting with crime.
 - E- Developing a welfare state.
- V- Conclusion.
 - F- control population.
 - G- Gender equality.

As we see : through the past years, Pakistan has been a victim of many social problems due to some reasons like political instability, Bad Governance and lack of education in society. Two main societal problems, - due to which many other social problems erupt.

Poverty is the mother of all social problems. When poverty comes, there is a huge diaspora which is unemployed, mostly the young people like in Pakistan.

Poverty and Illiteracy have a deep relation with each other. When literacy levels decrease in a society, the intelligent people decrease and therefore, unemployment and poverty comes in a society.

Poverty also takes crime with it. Criminal activities followed by poverty occurs in a society cause every type of crime. such as, moral crime, sexual crime, crime against property, crime against state etc.

As we see in all Third world countries or the countries with high poverty rates in the world like Africa, South Asian countries, All of them have the highest crime rate as well.

People, in such places or in Pakistan are living low standards of life. Due to Inflation, they are living below the line to live lives. Their children get low *level* quality education. Pakistan is not producing good Doctors, engineers and businessmen in its institutions.

As good doctors are also not being produced due to lack of quality education, the health sector is also losing its strength due to the lack of knowledge and inability to treat the patient.

So, in this case, the privileged class of country goes beyond the borders to get themselves treated by the foreign ~~on~~ and well-equipped doctors.

Education and Poverty have their roots deeply embedded within each other and state's stability. To address educational issues, schools running under government sector are ~~and~~ unable to tackle with them. So, the Government of Pakistan, taking immediate action, should ^x give ^x introduce voucher system for the parents of children. So that, we can get their child well-educated from a school they are satisfied with.

When the education will be provided to the children of every class equally. Then there would be less chances of unemployment. Although, there is a strong need of single national curriculum to be introduced. A previous government did a significant work on it but due to some political instabilities, it remained unable to promulgate or actuate that curriculum.

Education eliminates poverty. Pakistan has to work on educational sector to promote education to excel in every field of life. Pakistan is a hard country.

Criminal activities have to be minimized to provide quality education to the new generation. Crime increases due to lack of or improvisation of education.

A societal imbalance occurs in a society due to presence of high levels of illiteracy. People make their societal class system on the basis of money and assets. The educated personalities have no respect in society and people identify other people on the basis of status and wealth. So, the education shatters all this stereotypes in a society.

To deal with such problems, some measures should have to be taken on grass-root levels by each individual. It is necessary to enhance education system after getting out from "Ratta strategy". Pakistan should mainly focus on the teaching protocols.

Our Government should have to provide equal opportunities to everyone for business. Make business easy for individuals.

Pakistan has its exports at a very low level. And we import many things including food, machinery and other parts of automobiles from ~~it~~ outside world. we are dependent on the world.

So, Pakistan needs to invest in building industries and to boost up its manufacturing process - to increase her exports. In this way,

GDP of Pakistan will get a surge. As we can see in the recent

(23 - 24) Budget, Pakistan is mostly dependent on the financial aids from the International Financial Institutions and Extended Fund Facility (EFF), a program by IMF for Pakistan.

Pakistan should impose zakat system and establish a welfare state system to eliminate poverty.

Pakistan's population is continuously rising and the Government should make some strict policies to control the population. In this case, it is the need to educate the poor and illiterate people that not to struggle for getting a son. Gender equality and women empowerment can also address this issue of having a strong wish "for" to get a "son." Secondly, related health centres can also play a vital role in controlling the rising population in Pakistan. According to Gender Equality Index, Pakistan is ranking between the lowest countries in the list. Gender Inequality is present everywhere in the world. But it is present in its worst form in Pakistan. The main cause of this issue is the misinterpretation

of our religion Islam by
our the so called "Mullahs."

To conclude is
the education and poverty
both are the social issues
of Pakistan. These have to be
addressed wisely but no
hastily.
