History is full of those people who started their life with the most difficult circumstances but with the passage of time they became one of the world's successful and famous personalities. Success, respect and dignity is not easily served only wealth is served easily for that there is also condition that your forefathers should have property only then you will get wealth. With wealth you can earn materialistic things but not happiness. Sometimes it takes a century for a person to earn respect but for humiliation a single moment is enough.
