Conclusion :-

Essay

It is said that, Unemployment is the national danger. Pakistan is dealing with the serious issue which is the high rate of educated youth's unemployment. Survey shows that **26%** of the educated youth of Pakistan leave Pakistan to settle abroad. This is because of the Unemployment. The Educated youth should be utilized in country's progress instead of neglecting them.

Here, the ^{educated} question arises that why the youth is neglected? Education is the foundation of every state. The most recent statistics shows Pakistan's literacy rate **6.5%** in which 3 out of every ten (10) are

facing unemployment (The Nation)
The First and important reason is access to quality education. Pakistan's education system is weak the Annual budget allocation for education is less, the quality teachers aren't trained, the institutes lack the basic resources which makes it even worse likewise, the other factors include unfairness on limited seats. Even in government sectors the seats are reserved for a family member or friend. Pakistan is facing the evil of different forms which can ultimately cause the problem of unemployment. Rich Aristocracy can be seen in different sectors of Pakistan and those who cannot afford is left out. This is the reason why the educated youth is neglected similarly, some times lack of skill can be seen in the educated youth. This is the problem's link with the weak education system. Although students get 14 years or 16 years of education but they lack the very basic knowledge and skill. It is because of the theoretical knowledge which

is never implemented practically
there are limited economic
resources or the Annual Budget
allocated on education.

Pakistan Economy has facing the
challenging phase which also
cause the increase in unemployment
rate. There are limited in economic
resources to invest in Business
and provide job opportunities.

Study shows **31%** of youth
is unemployed **(Tribune)**

There are several other factors
that cause employment but the
question is How to utilize

the educated youth in Pakistan.
Some of them are as follows;

The Government should increase
the seats so that more educated
and deserved youth can get the
chance for allocation

Additionally, by providing the
job opportunities in the private
sector can also be benefiting for
the young, educated people

Also, by improving the weak
educational institutes of Pakistan;
building laboratories for the

science students, giving quality
education, practical implication,
well trained teachers the youth

Can be utilized for the betterment of the country.
There are some students who cannot afford their educational expenses. Some have disability for that government should provide scholarship and quota seats for the disable persons.

There should be pure and clear induction on the basis of merit. Those who are willing and have the ability should be selected.

Survey shows **67%** youth wants to leave Pakistan for the employment purpose. If government can take steps and provide them opportunities they can better serve their own country Pakistan.

Unemployment had alarming effects on Pakistan causing poverty, inequality, increase in crime rates.

It is clear that if the problem is not taken serious or ignored the problem can get worse. This problem need systematic solution for short and long term issues.
