Subject: English Essay

Date: 6-14-2023

1. Introduction:

Half a doctor is a danger to life and half a religious scholar is a danger to the faith; likewise misunderstanding or half knowledge of feminism has created danger for the main purpose of it in our society. In our society people lack the understanding of the concept of feminism and the reason for that may be; like as it is being portrayed that it is in contradiction with the religion and social norms of our society as some slogans have been shown during the protests conducted by feminists. And genders other than female also does not support the concept of feminism as it speaks

(2)

only for the rights of one gender "then women". But all the above claims against feminism have been rejected by feminists in Pakistan.

2. Understanding of the Concept in Our Society at Large:

Concept of feminism in our society is not understood as it's mainly initiated for, and that is the one of the main reasons that this concept is not being accepted by our society at large. The only real and clear understanding of anything or any concept can make it to be accepted in any society.

(3)

3. Feminism the misunderstood concept in our society:

(a) Lack of the awareness and education of the concept of the feminism is the one of the main reasons that its main purpose is misunderstood in our society. That unawareness leads to the unacceptance of the concept of the feminism and that's why majority of people are against feminism in our society; which is clearly shown at the time of protests conducted by feminists.

(b) The slogans shown in the protests portray that the feminism is against the social norms of the society. So people after seeing that slogan; that may not be against the social norms of other societies, like

5

European societies, but are against the social norms of our society, people resulted that feminism is against our social norms which is not reality, it is because the misunderstanding or the lack of understanding of the concept of feminism by the protesters themselves.

The slogans like "میں اپنے جسم پر کپڑے نہیں پہنتی", "ایک لڑکی کے جسم پر کپڑے نہیں پہنتے" and other like that resulted that the

feminism is against the social norms of our society because at some extent these slogans are against the social customs and social norms of our society here in Pakistan.

(5)

c. And these slogan and talk on talk shows by if some feminists half a scholars resulted the misunderstanding of the concept of feminism which concluded as it is also against religious principles and norms. As our society being a majority Muslim folk. people gained a really adverse opinion or result when they saw the slogans like

"نِسَاءٌ كَمَا كُنْتُمْ" or "نِسَاءٌ كَمَا كُنْتُمْ"

And there are other slogans and concepts that can be a normal and not controversial slogans in any other society where people have different religious customs or norms but because it was not the right way to protest in the favour of rights of different gender, this society did not accept it.

(b)

d. It is also the result of misunderstanding that the protests during the different waves in Pakistan from very beginning are speaking about the separate rights of women, not the equal rights of women, men and other genders also. As it was the same situation during first and second waves of feminism in U.S.A and Europe since 1850s to 1970s, but after that the feminists of third wave neglected, rejected that concept and spoke for the equal rights of all genders, but is not the case in protests and slogans raised by feminists here in our society which is also the clear misunderstanding of the concept of feminism.

(7)

(c) The protests conducted only in the favour of the rights of women resulted the one sided protests, and other genders which need the rights like LGBTs did not support the concept of the feminism given here in our society. The actual concept of feminism is movement of rights for all genders but lack of understanding resulted to speak only for the rights of women.

4. Feminism; the clearly understood concept in our society:

(a) Feminism is a clearly known concept in our society, everyone knows women here in our society are depressed due ill treatment and they are not given their fundamental and basic rights.

(b)

and feminists protests for the protection of their rights. But it is being deliberately with deccive manner shown that feminism is not clearly understood concept in our society. If it is so then why people join and participate the protests.

(b) The feminism is not against the social norms of our society; the few misinterpreted slogans can not decide the concept and demand of feminism. That few slogans shown in social media are itself right but misinterpreted deliberately to defame the feminism which is only to get the all genders specially women their right which are badly violated.

(a)

c) Neither it is against the religion; but it is against the misinterpretation of the principles of religion, no religion suggest the cruelty over women as is being done to them.

And no religion permits the violation of fundamental, the inherent and human rights of women and other minority genders. The slogans may be misinterpreted, they itself do not contradict the religious norms of any religion.

d) Initially feminism was demanding the fulfillment of the rights of women only but gradually it is being moving towards the rights of other genders also, like recently a protest and conference was conducted at Moxchi Press club for

(10)

protection of medical rights of trans
LGBTs and transgenders which resulted
the discussion over it in Sindh Assembly.

5. The misunderstood concept of Feminism must be cleared:

a) There are numerous incidents/events recorded
on social media, when uneducated women,
who participated in the protests, when ^{were} asked
they did not know even the meaning of
feminism, so the ~~is~~ it needs the awareness
to make the people understand the
concept of feminism.

b) The slogans are also against the social
norms of our society; the slogans which
I have mentioned above can not be
shown in our society, every society has
its own norms, and feminism works subject
to these norms but in our society the

(11)

concept of feminism itself is misunderstood.

(c) The misunderstanding of the concept of the feminism also resulted that that slogans went against the fundamental principles of the religion which is not acceptable followers of the religion.

d) Main purpose of the feminism is to protect the basic, and human right of all genders equally, but here it speaks in the favour of separate right of women not the equal right, which is the main concept of 3rd wave feminism.

e) Feminism is not only to support the rights of women but to support the very class of gender who are

190

being not given their basic and fundamental rights, but here in our society the misunderstanding of the concept resulted to only speak about the rights of women.

6. Conclusion:

The feminism is not clearly understood concept in our society. As the who are calling themselves the main part of the feminism here in our society many of them do not understand the main concept of the feminism which results the misunderstanding in the minds of common people and the followers of feminism also. The slogan rejected by majority of this society of the result of the misunderstanding of the concept of feminism by the writers of those slogans.
