About few books it is usually said that they  
have transformed the world. These books  
are selected by the intellectual people according  
to their choice and circumstances. Although a books  
transformed the world ~~at~~ the same time there  
are few books that <sup>deviate the world and</sup> are responsible for its  
backwardness. In any society, through published  
books it can be analysed that whether  
these published books will transform the  
world or entangled it in obsolete practices.  
In this perspective, if we analyse published books  
in Pakistan we can see that these books  
are influencing people's mind with religious  
prejudices, Sectarianism and unnecessary nationalism  
sentiments. This mindset ~~can be seen~~ is reflected  
in Pakistani society.

## Title: Commodification of Art

Art recently became a business venture. People barely understood art as prestige rather through art profit is achieved by businesses. Before that traders traded cultural art as commodity. During 1980's the trends of commodification became gloomy. When large corporations invested in great pieces. For example, Ryoei Saito purchased portrait of Van Gogh's worth \$82.5 million. A representative made ethical appeal to him that art remains the possession of world. Despite ethical appeals art is becoming business activity. The world donot possess means to acquire it. Only J. Paul Measuem asserts the

best pieces. Ultimately, art will diffuse  
in private hands.
