SAARC is a regional cooperation and cooperation between regional countries like India, Pakistan, China, Bangladesh, Bhutan, Maldives, Nepal and Sri Lanka. It is comprised 3% of the world land area, and 24% of the world's population and 8.21% (USD 4.47 trillion) of global economy as of 2021 according to reports.

But there is remained future in solutions with regions old matter of territorial illegal-occupied of Kashmir (TIOK) dispute, and could not solve to the matters and also occur as security challenges and arms race, energy deficit and water dispute.

Security challenges: as increased recent attacking massacre in Peshawar which are were seven people who were attacked during of prayer their was accepted responsibility by TLP side of Afghanistan. Not only there occurring in Peshawar but also there are a few months happened in Islamabad 2/10 where ^{there} one who were attacked on 25/10 ~~are~~ blasting bombing.

In 1998, India was the first to test a nuclear device. The ^{successful} test was conducted in Pokhran, Rajasthan. The ^{test} was a ^{plutonium} ^{device} with a yield of 15 kilotons. In recent months, India has been working on a Smart-Air-Targeted Weapon (SATW). This is an IAS technology class smart precision-guided.

Deficit in SAARC Energy: While SAARC has been examined to extend assistance to Islamabad, while SAARC energy sector was adopted in 2008 but it could not be fully cooperated with Pakistan and resulted Pakistan energy from Europe.

Conclusion

The SAARC has ~~the base~~ ^{been} must have to follow common rules with according constitution and solved all matter of countries. As, BRICS's are becoming successful in regional cooperation with other countries and development countries like ^{India} ^{China} ^{and} ^{others} must be provide assistance to India. ~~separation~~ ^{cooperation} with Pakistan.
