Role of Educated parents in productive growth of a child

Precis

For far-sighted development of a child, parents should have certain qualities like education.

Education of parents is sine qua non for productive progress of a child. Educated parents make their children civilised citizens. They inculcate them integrity and patriotism. Thus, parents play a key role in success of a child. Proportionally, children should take care of their parents when they grow older, and become weak as they defused all their potential and energy for success of children. Indeed, no one can replace the kindness of parents.
