

# Lack of agricultural modernization and Population explosion

## OUTLINE

### 1. Introduction

The topic is about the interrelation of the two

**Thesis Statement:** The lack of agricultural modernization and the challenges posed by population explosion are interconnected issue that require attention. However, proper measures should be taken to address these challenges.

### 2. Lack of agricultural modernization and consequences of population explosion

### 3. Problems afflicting lack of agricultural modernization

Sentence structure

- Limited access to resources
- Knowledge and education gaps
- Inadequate Infrastructure
- Decreased Productivity
- Environmental degradation
- Economic Implications

These are effects not problems or causes leading to agricul

### 4) Factors Contributing and Implications of population Growth

Don't merge causes and effects together

- Declining mortality Rate
- Lack of family planning
- Strain on resources
- Urbanization Challenges
- Environmental impacts

Too broad. The arguments should be specific in nature

DATE: \_\_\_/\_\_\_/\_\_\_

Do not merge these two separate key discussion points into one

## 5) Interconnection and Impact of lack of agricultural modernization and population explosion

A. Examination of the interrelation between agricultural modernization and population explosion

B. Analysis of the combined impact on food security and economic development

## 6) Way Forward to Solve Problems of agricultural modernization and population explosion

a) Investment in modern agricultural practices

b) Improving access to education and resources

c) Promoting sustainable population growth through comprehensive family planning

## 7) Conclusion

Sentence structure

Agriculture has been practising <sup>ed</sup> when first man foot on the earth. In the early civilization man <sup>hunted</sup> the animal and <sup>ate</sup> eat their meat as a food.

Later on when the population increase<sup>d</sup> over ~~the~~ time, they started

cultivation of different fruits and vegetables. As the time <sup>ed</sup> passes human<sup>s</sup>

invented different machines and technologies and these machines and technologies

are also used in agriculture. The world today faces significant

Tense, sentence structure

The topic has not been properly subdivided according to the requirement

These are the core of the topic. You cannot just limit these to one subheading each

DATE: \_\_\_/\_\_\_/\_\_\_

Expression

Challenges because population is increasing large number. In developing countries population is increasing very swiftly but due to lack of resources these countries have not adopted modernised agriculture advance technology in agriculture.

modernised agriculture

The lack of agriculture modernization and exponential growth of human population pose threats to food security, economic development and environmental sustainability. There are many problems of agricultural modernisation limited access of resources.

Sentence structure

Furthermore, knowledge and education gaps, inadequate infrastructure and environmental degradation. However, there are many factors contributing to and implications of population growth like declining mortality rate, lack of family planning, urbanization challenges and environmental impact.

A mix of causes and consequences

Therefore, there is a need to take several steps for boosting agricultural modernization and reduce population growth. Investment in modern agricultural practices. Another step improving access to education and resources and promoting sustainable population growth through comprehensive family planning. If there is technology and literacy rate high, this will also

Interrelation of the two?

Sentence structure

lead to boosting up the production sector in developing countries. In a nutshell, the ~~lack~~ of agricultural modernization and the challenges posed by population explosion are interconnected issues that require attention.

However, proper measures should be taken to address these challenges.

The lack of agricultural modernization and population explosion are interconnected issues with significant implications for food security, economic development and environmental sustainability.
