- d) Less share in country's economy

#### 5- Way forward

- a) Increase in education budget
- b) Modern Infrastructure
- c) Use of modern methods
- d) Training of staff

#### 6 - Conclusion

A thirsty crow story is very common in Pakistani society because almost every student remembers it at primary education level. The crow used ~~put~~ pebbles for drinking water from pitcher. Now a days, a picture of crow related to that story was circulating on social media. The interesting thing was that the thirsty crow was using straw to drink water from pitcher instead of putting pebbles in it and waiting for a long time for water to rise. Similarly, education

system of Pakistan should learn from now that time has changed and method requires replacement. Institutions have neglected the enhancement of mental specially intellectual abilities of students because old teaching methods. There is focus on marks gaining instead of skills. It has negative impacts on modern students as they can't be able to meet the requirements of industry. It is causing unemployment. However, by will of the leaders and institutions head, education system can be improved. Modern syllabus, practical work and training of staff can make it possible.

In a nutshell, In Pakistan education system is not comparable to modern world. Enhancement of intellectual abilities are neglected. By adopting modern system it can be achieved.

In Pakistan, work on

intellectual abilities is not up to the mark. Students study for sixteen years. They get CGPA and marks but not the required skill for job in any company or industry. This leads to unemployment as in 2022 almost 8 lac students who were graduates left Pakistan because of unemployment. Universities don't give them skill so that they can start their own work. So, this neglect is the major problem of education.

There are various reasons of neglect in intellectual enhancement but the most prominent is that students are not admitted on merit. As most of the institutions are private that's why they want more and more students to run their institution. So, it can be said that if students coming to class are not on merit can not
