(a) It will deteriorate foreign policy of any country.

(b) If we keep our words, countries will invest and trade with us.

7. How can we create harmony in our words and action.

Conclusion

we are not what we
say but what we do

Most of the times,
people are perceived
on the basis of
their words. What they
say, half or partly
describes them. Sometimes
their words sooth
others feelings and
make them feel
better. What make
our words more
effective are our
actions. It is because
their as our actions
are what reflects
our inner personality.
The fulfillment of
words is more
important than the
words themselves.

what we perform
are two different
things. It is said
that the actions
speak louder than
words. Our actions
are justification of
our actual thinking
more than our
words. It is usually
noted we say the
things that we are
not intended to
do. We do not
have any idea that
how our carelessness
in words is harmful
for the people
we are making
commitment to. We
have to make and
realize difference
between our sayings

and our deeds.

Because when we are making promises, we must fulfil that words. Otherwise it would be different for what we say and do and will make it difficult for people to trust us.

In daily life, we see how unpromised words are affecting us. It has more mental and psychological effect rather than physical. It is understated but has an emotional affect on us and that too deep.
