English precis Test-1

Title:- Work, not Money: The foremost priority of well-educated individuals.

Money has never remained the primary focus of any well-educated, intellectual or brave man. All healthy minded people love to fulfill the purpose of their job instead of merely assuming it a source of income. Whether a soldier who without being worried about the salary is deeply interested in winning the battles, priest who love to preach, or the doctor who tries hard to save lives of his patients. Thus, for all well-educated individuals work is priority, not the money.
