

Neglect of enhancing intellectual ability in our education system.

* Outline -

of intellectual abilities

- Negligence in educational system will cause less intellect and dependable leaders in future.

- What is intellectual ability?

- Ongoing system of education in Pakistan

- Problem in edu. system causes negligence.

- Lack of standardization

- Gender discrimination

- Lack of technical education

- Low allocation of funds

- Inefficient teachers

- Poverty

- Corruption

- Social imbalance

- Mismanagement of system

- Privatization

- Educational policies

- Infrastructure problem

- Increase in population

- Taking education as a business

- Old school of thought

- Political interference

Suggested solutions for educational systems:

- Standardization
- Talented and qualified staff
- Staff training
- Motivational & intellectual programs
- Scholarship & financial support to students
- Refused technical education
- Institution of more practical learning.

• Impact of focusing on intellectual abilities in Pakistani education system.

• Conclusion.

Topic:

"NEGLECT OF ENHANCING INTELLECTUAL ABILITY IN OUR EDUCATION SYSTEM"

Education is the road to national development. It creates sense of responsibility among the people. On the basis of education people not only realize their duties but also know how to achieve their national, social and individual rights. One of the goals of education is to enable the people by enhancing their general consciousness regarding their national and international position as global citizens. This national exerts an atmosphere of trust and cooperation in the society. Education promotes economic development and consequently people become prosperous and play their respective roles in the overall national development. (Saidi M.M. "Evaluation of education plans and projects." Islamabad National book foundation). Pakistan is a developing country. Its economy is weak. There is a lack of political stability in the country. Besides, the country is

In the deep grip of increasing political turmoil, expanding terrorism, insistent sectarian violence, social instability, and economic degeneration. All these issues are directly or indirectly the ~~offshoot~~ offshoot of a weak, polarized and non-urgent educational system that creates negligence. Of intellectual abilities in educational system will lead to a less cognizant or intellectual and dependable leaders in society.

Intellectual ability refers to the skills required to think critically, see connections between disciplines and problem solving in new or changing situations, memory, creative problem solving and vocabulary also contribute to the level of an individual's intellectual ability. While scientists differ on one standard definition of intellectual ability most agree that intellectual ability must include a high level of abstract reasoning and thinking skills, the ability to acquire knowledge and problem-solving abilities.

Patrick Murray and Huberman describes it as:
"The object of education is to prepare the young to educate themselves throughout their lives"; we should give our youth the way to educate themselves. Edwards Everett said that "Education is a better safeguard of liberty than a standing army,"

Numerous international assessments could explore that Pakistan is lagging behind many countries in achieving the education for all goal (EFA). We were the signatory to the treaty under Doha harmonizable where it was decided by all the developing countries that they will be trying to achieve the target of EFT in the meeting held in Geneva in 2000. UNESCO data in Pakistan are at a lower EFA development index (EDI) because of low enrollment at primary school, adult literacy, ~~it~~ ~~in~~ ~~gender~~ gender equity and equality, ~~in~~ ~~quality~~ quality of education, adult literacy in Pakistan, in spite of concerted efforts, fail to go beyond the border line of 50 percent. Five

warmer literacy ~~growth~~ is much
more belittling as ~~being~~ ~~1980s~~ ~~1990s~~
percent of the adult women sample
own read. The more embracing would
be that we would not be adding
the target to achieve the adults
literacy by 2015. Progress towards the
achievement of the target is especially
slow, while gender parity goal is at
rate of not being achieved by 2015.
Moreover more than 6 million children
are out of ~~work~~ school.

Education system in Pakistan:

Education system in Pakistan is
really having a bad configuration at
the moment. There is no doubt in
accepting the fact that education
stands the backbone for the development
of nations. Looking at the history of
nations we may safely reach the
conclusion that the advanced nations
of the world could reach the zenith
of prestige and power taking support
from education. The allocation for
education are the meager and in spite

of allocation the amount is not spent
for what it was meant for ~~that~~ as
the corruption is found in all the
tiers of education and also because of
the same delivery from the government
institutions that is much below the
desired and spread level. Despite of
having numerous universities in our
country there is a lack of quality
and intellectual students, universities
are more focused on results and
GPA instead of the cognitive element
in their student. There is a need to
develop technical and creative skills
in students as the generation needs
- to be rational and intellectual is
- that they can be a better leader in
future. The students we come across
are the degree seekers rather than
a knowledge. The increase in college
and universities does not mean a
quality education. Instead it becomes
the business to spoil the generation.
The socioeconomic scenario is directly
affected with the status of education
in the country. • we are under ~~affluence~~

obligation to raise the education of our population to the level of our South Asia neighbour to combat our own social formidable challenges. Education is bound to be the keystone and tangible, defense mechanism for a nation on the social, political and economic fronts. But the down-to-date condition of education in Pakistan bears an ample testimony of the fact that it is unable to defend its own nation. Over the span of 64 years the nation has been given the 13 plans and action plans but we could not find the march towards success and are waiting for a suitable role could take the system of self of himself. The contribution of Pakistan has led to the fact in the following words.

The state of Pakistan should remove ~~efforts~~ illiteracy and provide free and compulsory secondary education within the maximum possible period.
