Prioritizing Profession Instead of Money.

Title: Professional men's priority to work

All educated person do not make their primary aim to earn money.

In the same way, all healthy people like their dinner but that is

not their main aim. However,

Satisfaction achieve through work

is better than money. For example,

A good soldier wish to win

battles, clergymen's want to preach

and doctor desires to cure his

patients instead of only getting

fee money for their professions.

In a nutshell, professional men

prioritize their work and money

is their second priority.
