As we know that the education is road to ~~weak attention grabber~~ development. The education of developing countries led them towards the top. Education is pillar of any country development. It creates sense of responsibility among the people. on the basis of education people realize how to achieve their goals. It creates sense to live a beautiful life. It helps people to realize their role and responsibility. Education tells people about their social and individual rights. one of the goal of education is to enable the people by enhancing their general consciousness regarding their national and international position as a global citizens. Education teach people how to behave in your ~~group~~ surrounding. It teach people to respect the humanity. The education system provide social and moral ethics to the people. Education prepare ones to fulfill their dreams. Education is the most powerful weapon, which can change the entire world. Education play an important role, without it one can not ^{distinguish} ~~distinguish~~ between good and bad. Education is one of the basic necessities of life.

The Government can play an effective role to enhance the intellectual ability in our education system. The ~~resources~~ of Government have all the resources, which can play an important role. As those countries which have provide more attention to their education system have reach to one of the leading countries. The role of Govt is one of the important factor in the development of education sector.

The intellectual ability in our education system is one of the basic need of today era. Which is possible through updated and modern way of learning system. Those countries which have adopted the moderate system in their education system have successfully ^{ref?} developed their education. The modern and updated system have great influence in enhancing the intellectual ability.

Research based learning system lead to build the critical learning. Research is the most intellectual form of critical thinking. Research based knowledge force the students to think critically and to find out the solution. Research based knowledge critically enhance the

Ability of individual.

Practical task is one of the efficient way to enhance intellectual ability. Practical task enhance the internal skill of individual to do its work in proper way. Practical work enhance the capability of one in proper way.

There are many way due to which one's can't enhance its intellectual ability. One of them is out-dated form of learning. ~~the way of learning. these the~~ ~~outdated~~ The outdated learning system and out-dated teaching method is one of the leading obstacle in the way of intellectual learning system. ~~can~~

Untrained teachers can influence the education system. Training is essential for quality performance. Although there are various teaching training institutions but they are unable to do their responsibility. There are no proper training standard in the available training institute. Most of training institute are closed due to lack of funds. Untrained teachers have great influence to neglect the intellectual ability.

Cramming System is a barrier to enhance the intellectual ability.

Cramming system became an absolute obstacle in the way of Critical thinking. Cramming System prohibit to think critically. Cram Stop the individual to think critically instead of it remain ones to the available resource.

Poor Structure of higher education is one of the stunning problem. The higher eduy poor structure badly effect our education system. There will be no implementation of merit in selection of teachers. The allocation of budget for education sector will be low.

Technology play an important role in education system. The lack of technology is a major cause of enhancing intellectual ability. ~~Some countries~~ ~~are~~ ~~not~~ ~~having~~ ~~technological~~. No proper internet system in edu to build up their ability.

These factors can lead to unemployment among the graduates. The unemployment rate will increase. Due to which the economy can be badly affected. According to a survey the unemployment rate in Pakistan for 2021 was 4.35%, a 0.05% increase from 2020. (Front, September, 2021).

The unemployment factor can lead the graduates into brain drain.

The graduates were unable to compete at international level.

The old and outdated educational system remains the individual to compete with others. Intellectual ability of individual can not develop with outdated system due to which they can't get scholarship at international level.

These individuals become unable to achieve their goal.

The old system does not teach them how to achieve their goals. Thus they remain un-intellectual and stay with a simple task instead of achieving their goal. Thus can reach to position.

These workers or personnel remain un-skilled in their field. No practical work and lack of research based knowledge remain them un-skilled. They become task oriented.

There must be research based knowledge to enhance the capability. There should be sufficient budget for research purpose in education system. More to rely on examination system must opt the research based knowledge. There should be quality institution who adopt the system of research, Research.

The system must be updated into advanced learning system. To enhance the critical thinking of students, adopted the modern and up to dated learning system.

The knowledge must be promoted for the sake of knowledge, not only for job. The individual must be trained to learn for developing their skill, and trained them in way they can reach to their goal.

Training^{ing} of teacher is one of the essential part of education system. Teaching is a Challenging job. There must be opportunity to train the teacher so they can enhance the intellectual ability of their students. To establish training centres for the training of teacher. The teachers must be trained in modern way by using of technology. This will provide a great help to teacher to enhance the intellectual ability of an individual.

This concludes the education develop individual in all domains of life. ~~Such~~ such as the social, moral, political and economical way. It's a dynamic force which enable every one to achieve their goals, as well as their national goals. With effective educational system many countries are leading the world. Education is one of the essential part of development, so it is necessary for every country to enhance the skill and intellectual ability of the individual through
