Duty/Work more Important than Money.

It is impossible for a healthy educated person to make money in their life, but

they want to do some good work in their life. All healthy

people like making money, but

also like to enjoy the sensation of winning it. Their objective

is not money, but doing

their job well. Only with

ill educated, foolish people,

Fee is more important than

work. But trained person

work is first, their fee

is second.
