A Job IS More Important Than Making Money.

Making money is not an important for a intellectual human. They enjoy their dinner but it is not their main goal. Like, A Soldier, wants to win his fight. Getting paid is not his main objective. Likewise, a clergy man's mission is to spread religion, not getting money. Likewise, Doctors do charge their fees but firstly they save humans' life. Although some kind hearted doctors low their fees for the betterment of patients. So, All righteous & brave men put their job first and money secondary.
