

English Précis Test - 1

Loyalty of Eudites to their work

Just like making dinner, earning to gain profit, is never the main objective of an accomplished individual in any field. For instance, a doctor or a soldier. Not to say that they do not appreciate the money, they do, but it is not their main goal. The aim of a skilled doctor is to treat his patient with no financial expectations. Unlike qualified men, for illiterate and uneducated, the money comes before their work.
