Batch: RWP-039

Title: Work is more important than Money

Precis: Money making is a common phenomena in life but not a principal aim of well-educated, trained and a brave man. A brave soldier prefers honour and victory more than his pay. A good clergyman more interested in moral welfare of his people than his returns. A well-trained doctor values the case of his patient over his fee. Thus with all the well educated intellectual persons, their work is first, money next.
