

Moral decline Politics: Cause and consequences.

Outline:

Introduction

- Thesis statement

why This crisis?

a) Hung Parliament

b) Civil-military divide

c) Lack of Political Experience

d) Bad governance

e) Foreign conspiracy

Consequences of Political crisis

a) Decrease in democratic systems

b) Decrease in FDI

c) Bad governance

d) Devaluation of Economy

e) Deterioration of good impact and relations with neighbour countries

Conclusion

Moral decline in politics is not new problem. It is old as Pakistan old. Moral decline, political crisis occurs due to the involvement of other institution in politics, not long sighted policies and lack of confidence in political leaders and members. By moral decline in politics, politics system not able to do decisions which are good for the states and puts ~~the~~ result in negative manner which cause deterioration in economy, degrade the unity of country, all these factors mentioned above are against the one's country and security of a country.

The political decline in politics, the reason behind this is hung parliament. Hung parliament is formed with collaboration with all parties within state that are local and National level. All these ^{political} parties joins to each other and collaborate with govt

with the interest of their Party instead of the state interests and development. The govt which is formed by the hung parliament is not stable because the party mandate of every party is not same and all the parties start leg pulling not works properly for the welfare of public and then the moral decline in politics arise.

More over, the other main factor behind the moral decline in politics is civil military divide. A country in this world remains stable when their relations with military will be stable. Under-developing countries like Pakistan, in Pakistan's birth the relations with military are in rift and military is integrated in politics and becomes the part of the political system, with the norms and traditions exercised firmly and had proved effectiveness but in ^{under-}developing countries, the political participation of military and civilian institutions are not

standing at sound footprints. This relations leads a moral decline in politics within civilian institution and military.

Lack of the political experience of party in ~~Govt~~ Government is the major cause of the moral decline in politics and leads towards the political crisis.

A representative party when came into government, all the representative members are the inefficient to perform well in society even at international level to build good relationship and make foreign policy efficiently. which creates the rift ~~to~~ between the society as well as in parliament and Assembly members and in opposition party. ~~and~~ By this manner and inefficient and inexperience behaviour of political and representative party being criticized and ~~causes~~ cause the moral decline.

The inexperience behaviour of politics leads a bad governance

in state and criticized by the people and other parliament members which are in opposition party in parliament.

Not ^{only} but least factor which cause the moral decline in politics and create the political unrest in politics is Foreign conspiracy of super power country of the world. In content of history, the under developing states like Afghanistan, Palestine and importantly in Pakistan content, the Foreign conspiracy cause the regime change in the ~~the~~ state and take the control over the party or government which are not good in performance, even they are good in deliverance, they not work independently, actually they work according with other interception country which not perform the in the interest of a state and cause the unrest in a state moral decline being start by the state.

The impacts of moral decline in "politics and ~~case~~ become reason of political crisis are severe which puts the country in danger and national security of of country is effected.

Decrease in the democratic system is the which is emerge in the result of the political decline when the political parties not working according to the given mandate which is prophet of the society is effected ultimately decline in the democratic system of a state

Political unrest and decline in the politics decrease in the Foreign direct investment (FDI). Due to the political unrest in Pakistan, FDI decrease -390.93\$ Million USD in Oct,

As decrease in foreign investment the currency rate as compared to USD dollar decline and effect the economy badly.

Hence increase inflation in a state In current scenario ~~the~~ of ~~the~~ Pakistan inflation is at highest in history is 315%. due to the

Comparison of dollar to PKR. $1\text{USD} = 282\text{PKR}$.

As decrease in the economy of a state the Foreign direct investment decrease (FDI). ~~the investing country~~ FDI declining devaluation of currency and inflation increase which effects the people ~~social~~ socio-economic life. As a result poverty increase. This poverty ~~like~~ links with crimes, unrest, terrorism. ~~Because of the~~ crimes and terrorism impads badly the good and soft image of a country. ~~At~~ This image deteriorate the relations with other countries. All these factors impeded the development in a country and also decrease in the economy factors.

To sum up the debate, Political and moral decline in the Politics create the unrest in a state ultimately this unrest leads towards crisis of economy, energy crisis, poverty and terrorism in the country.
