

Title: Money ^{is} not a priority for brave people.

It is rare for a person to have money as prime goal of his life, as food is somehow.

Healthy minded people achieve money; but

that comes with goals - Like soldier, clergyman and doctors main objective is to fight, to preach and to cure the sick.

So for accurately trained and courageous men; their work is on ^{top of} priority list money comes next. Money is important factor ~~but~~ but not everything for healthy minded people!
