Title: For professionals: Work should be the priority

Indeed, it is impossible for a learned and genius man to make money his first priority just as he does his dinner on prior basis. All the healthy minded people enjoy the feelings of making money rather than making money his precedence. Just like, a soldier always glad to win his battle instead of getting money for his winnings. Likewise, the clergyman's purpose is to preach but not for fees. Similarly, the doctor's duty is to cure the patient and try to save their life. They should not prefer fee upon their jobs. Thus, work should be first for all other professionals instead of fee which are often given much importance. (111)
