## Sense of achievement

### Pleases the most:

A sensible person takes making money, only as a means to earn bread. It is sense of winning not making money which pleases a healthy mind more. eg a good soldier fights for enjoying the sense of victory. The clergyman finds pleasure in purification rather than remuneration. Also a doctor though likes fee, but desire to cure the sick surpasses it. Though making money is important. Yet for all rightly trained men, it comes later than the sense of achievement.
