Title: Self satisfaction

The educated & well thought man always have purpose in life, rather than just making money. Money can not give a person a satisfaction that they achieve by doing their work done. Whether a good soldier, clergyman and the Doctor have same purpose, not only getting money but peace of mind. Which the soldier get after winning the battle, and doctor perceive after curing the sick, and clergy man sense after preaching. No doubt money is always important in its place, but for a well educated and intellectual person self satisfaction is everything.
