Title: Work is more important than Money

Precis:

Phenomena in life but not a principal aim of a well-educated, trained and a brave man. A brave Soldier prefers honour and victory more than his pay. A good Clergyman more interested in moral welfare of his people than his returns. A well-trained doctor values the care of his patient over his fee. Thus, with all the well educated intellectual persons, their work is first, money next.

Idea is ok. But do not explain the examples. Just give their gist.

Title may be improved a bit.
