Allah called us "Asraf-ul-Mukhlugaat" (Superior to all creations). That's mean, we are capable of achieving everything. Our creator knows us well. He knows our capacities very well.

"And we ordered angles to bow the Adam (Human)." 99

(Al-Burran)

People around us may discourage us, but we should believe on our God. He is enough for us.

"By Olives, By fig, By city of peace Madina human yous are the great."

(Al Quran)

So, it is confirmed humans are capable to do anything. Only 1% of people succeed in life. Because, they know how to succeed. They know the secret of success and build their stamina accordingly. Let's learn the secrets and be in the 1% of next year.

Since our childhood, we are seeing magic in movies and cartoons. I used to think, does this magic really exist? Now, I grow up and can see the magic on earth. For Example: All the electronic devices, Internet, light, cell phone, planes and now even AI; these all are magics. Then question arise here, what is the secret of magic? It is focus. Yes! only focus. We don't need any extra things, only focus. Focus is the only magic stick, that can bring fantasy.

into reality.

We are the slaves of our minds. We think and assumes reality according to our perception. "Before every boxing match, I used to stand in front of mirror, and used to say loudly to myself: I am the champion! I am the hero!, I am the champion!, I am the hero!". (Boxer, M. Ali)

Successful people trick their mind according to need. We just need to train our minds.

We are no less than anybody. Everyone is perfect in his own way. We are eagles, living with hens. Once upon a time, there was an eagle's child was captured. And living in cage with hens. He did not know how to fly. But, that does not mean, he can't fly. We all are eagles living with hens. We just need to know our potential. We all are best.

I often saw people mourning on the failures of life. I saw people blaming parents, friends, events and even God. But reality is opposite. We write our destiny! It's our actions that are writing our destiny.

“Actions make life hell or heaven, human is nothing in it's instinct.” (Allama M. Iqbal). Accurate your actions, results will be fruitful. Whenever, we decide to do something, several fears come into mind. These fears are the hurdles in our success. We can't even take next step in fear. These fears might be failure, people, society and list goes on and on. “In our society we think a lot before doing anything in life. We ^{are} afraid of what will people say? I am very fearful, I don't think about anybody.” (Ahsan Khan)

Award winning Actress, Saba Qamar

So, we don't to fear at all.

Just make decision by our own emotional intelligence.

We are overthinking a lot. We are thinking what will happen after we fail! Nothing will happen after failure. There was a little boy with his horse. He was in forest in dark night. He was scared and overthinking. Boy said to horse, I can't see the next steps due to darkness. I can't reach destination. Horse replied: can you see next step? He said yes! Horse exclaimed! just take the next ^{one} coming step. We just need to take the next step, ignoring the darkness.

If we have dreams, we should have courage to achieve them. We should succeed or simply die in the struggle of success. We don't have any other option. Salah-hud-Din Auli crossed the sea with his soldiers. And he fired all

the boats. He said to his army:
You have to succeed or die
here. You have no option to go
back. And, they won that battle.
Being an eagle, we don't have
the option to fail.

Atleast, nobody should fail in
2023. We can learn anything,
just in one click. We have youtube
, Google and what not. Now, we
have no excuses to fail. If
we fail in 2023, it will be the
most embarrassing. People of stone
age will laugh on us. Atleast,
failure is not meant for us.

Whenever, we try to fly there
are winds. These winds restrain
us from flying. But these winds
are only our minds. Only we
are limiting ourselves.
