

Misbah Habib

Egles fly against the wind

Outline

1. Introduction

Facing trials and tribulations with courage is the high velocity formula for improving efficiency. However, succumbing to these challenges bring chaos.

2. Egles fly against wind depicts courage, determination, honour and pride

3) How facing the challenges bring improve efficiency

a) Fighting one's own demons bring revolution and unlock self-awareness

(I think therefore I'm Rene Descartes)

b) Courage to stand against injustice (The doll House, Henrik Ibsen)

c) Helps to challenge conventional wisdom (Galileo Galili & Rosa Park)

d) Overcoming the undemocratic forces (Turkiye cope attempt)

- e) Courage to stand alone for international cause (Greta Thunberg)
- f) Questioning exploitative religious practices (Niccolo Machivali)
- g) Resistance against apartheid (Nelson Mandela)
- I) Bringing economic revolution (Deng Xiaoping Economic Model)

4) Summing to challenges bring chaos

- a) Hinders Personal growth (Stoicism)
- b) Breeds violence in society (WHO report about domestic violence)
- c) Surge against racist attitude (Islamophobia, Burkani Ban)
- d) Disrupt world peace order (Middle east crisis, Palestine issue)
- e) Worsening Environmental issues (IPC, WHO report)
- f) Economic Dependency (IMF)
- g) Promote religious extremism (Hindutva)

How to counter chaos to bring
revolutionary change

a) ~~Individual~~ Individual efforts at
national level.

b) Collective efforts at international
level (UNSC, OIC)

Facing trials and tribulations with courage is the high velocity formula for improving efficiency. However, succumbing to these challenges bring chaos. Things can not be changed by changing the face, it can be changed by facing change. (Jane Austen). However, when someone faced with difficulties it gives the courage to change the situation ~~with~~ by facing these challenges. Moreover, one can not get away without ~~the~~ facing these problems. Similarly, eagles fly against the winds with courage, determination, honour and pride. Facing the challenges enhance one's ability to unlock the gate of self-awareness, courage to stand against injustice and helps to challenge the conventional wisdom, moreover it helps to overcome the undemocratic force at national level, it also gives the courage to stand alone for

international causes, to question the exploitative religious practices, and it also gives the courage to resist against apartheid and to bringing economic reforms. However, succumbing to these challenges hinders personal growth, breeds violence in society, incite racist attitude and disrupt the world peace order. Furthermore, it ignites the religious extremism, worsen the environmental issues and create economic dependency. However, to counter these challenges individual and collective efforts are required. It will make the world a best place for living.

According to the philosopher Friedrich Nietzsche "What does not kill you make you stronger" It depict the eagles fly against wind. The severe wind can not diminish eagles' courage or determination rather

it helps the eagle to fly high over the mountain. Unlike other birds) Hence, one's courage, determination, pride, honour and confidence help to stand out in difficult and challenging circumstances. Facing these challenges not only create ease in life but also exacerbate one's own ability to fight the against the severe challenges.

Facing challenges improves efficiency it start at individual level. The one who knows how to fight its own demons which exist in shape of self doubt, resentment and vengeful behaviour. All these things hinders one's self growth. The philosopher René Descartes presented the philosophy, "I think therefore I am." depicts that question one's self in order to cater doubt is always helpful. One can not find the truth

of this world without answering to self-doubt. It is the key for exploring the ~~knowledge~~ world's riddles.

Another way to explore the path for achieving the success is courage to stand against injustice. If one does not stand for one's self can not bring any revolution the world. The character of Nora in **The Doll House** by **Henrick Ibsen** faced the humiliation by her family members despite devoting herself for their services. In the end she realized her worth and ~~left~~ left that place as a protest. Hence one can realize the one's courage by taking bold action to face ^{problem}.

Moreover, in order to challenge the conventional wisdom of the world. One needs to be courageous, determined with honour and self confidence. However world is full of such example

Where one courage brought greater revolutions. Rosa Parks' courage to refuse to enable her to stand for her right and refused to shun her bus seat. Similarly, Galileo Galilei theory of heliocentric was the challenge to conventional beliefs. Hence, these bold steps opened avenues for further development in the world.

Furthermore, the courage to save one's nation against undemocratic forces is also a bold step towards bringing a revolutionary change in the world. The Democracy on which most nations stand to protect their people's rights. Türkiye President bold step to convince its nation to show courage to defeat its non-democratic forces in order to strengthen the country is written in the history. It helped the Türkiye to progress for.

the better future. Hence, it was the consequence of courage and determination. Moreover, question to the exploitative nature of the church in the history presented the revolutionary models to the governments and save the national interest. **Niccolos Machiavili** presented **justified ends mean** he presented the idea that in order to protect the national interest religion can be used. He challenged the existing model where ~~religi~~ state was used for the purpose of the religion. Hence, a courage was the base line to bring revolution.

The courage to stand alone also helped to highlight the important international cause like climate change. **Greta Thunberge** at the age of 15 advocated the cause of climate change.

At first she was alone to represent the cause later many other people joined her in the cause to fight against the environmental issues.

Resistance against apartheid also required courage, determination, honour and pride. **Nelson Mandela** was the leader who fought for the rights of the people. He was imprisoned for 27 years and faced a lot of hate and torture. His determination helped people to fight for their due rights. In the end, he was successfully became the president of the ~~set~~ South Africa. His courage is the example for everyone that hardships are there to conquest to success.

In 1979 China was facing economic crisis, low growth and inflation. **Deng Xiaoping** presented

economic model. Through his intelligence and courageous behaviours. China was able to stand on its own feet to counter the all economic challenges. In present era China is among developed countries leading the other countries as a role model. Hence it was all due to Deng Xiaoping courage to suppress all the hurdles for success.

However, succumbing to the challenges bring chaos. It hinder the personal growth. As one believe that one can not change it condition which completely a false notion. Allah will not change the condition of people unless they struggle to change it. (Al Quran). The basic criticism on the stoicism philosoph is that it states either you can dance it rain or sulk in

the rain it still be rain. Hence, accepting the fate without any struggle to change it, ~~is~~ halt one's personal growth. Hence, one succumb to the existing circumstances

~~More~~, moreover, being coward or running from the problems can not solve the issues.

The main idea which prevail in our society that women are the property of the men. Due to women's submissive behaviour they are subject to the violence. Hence, accepting one's fate and not struggle to improve it creates problem.

According to World Health organization report 30% of women are subject to violence by ~~innate~~ close one.

Hence, it invite violence if voices are not being raised against the injustice behaviour.

Furthermore, Submitting one's self to the injustice and inhuman circumstances

bring surge to the racist behaviour. One who does not know how to show courage and wisdom to fight for one's right ^{create} bring many deep rooted problems in the society. **Islamophobia** the intolerant behaviour towards Muslims in many western countries is that Islamic countries failure to stand for the ~~far~~ rights of Muslims.

Hence, Muslims faced ~~with~~ bans on their religious practices. Hence, lack of courage to face problems make one slave of other.

Furthermore, failure to ~~show~~ face the challenges also bring the collective loss in the world. **In middle east Palestine crisis** is the prime example. Where in **United Nation security council 121 countries** could not pass the resolution for cease fire and all these countries succumb to the

Veto power of USA. Hence, not facing the challenger ~~make~~ no promise of equality and leaves the strengths.

Furthermore, turning face from challenger also bring environmental issues. As the developed countries are major contributors towards climate chaos. The major effectees are the developing nations still these nations are unable to stand against developed nations for their right.

According to World Health organization climate change is causing ~~bring~~ the food crisis due to its alarming effect on the crops.

~~Interprovincial panel on Intergovernmental~~ Panel on climate also presented the report that world temperature increased 1.2° after industrial revolution.

Moreover, unable to fight the discrepancies in one's own economic

crisis increase the economic dependency on the others. IMF (International Monetary fund) provides the fund to the countries facing economic crisis. It creates the debt traps for these countries. Due to which these countries sovereignty is at stake. Because they have to follow **Structural Adjustment Policy** for approval of loan. However, failure to ~~an~~ mitigate challenges increase dependency.

Moreover, the absence of determination and courage to fight against the anomalies promote the religious extremism. In the recent era **Hindutva** or **Akhand Bharat** is prevailing (~~because they~~) ~~the~~ The grave violence and atrocities are the consequence of these ideologies. Kashmiris and Muslims residing in India are facing the atrocities of this fascist

Ideology. This the failure of international bodies United National Security Council and OIC to intervene on humanitarian basis to save there people. Hence, lack of commitment and biased behaviour caused these issues.

However, to counter these problems efforts are required at individual level. According to sociology interactionist view explain the individual create group and group creates communities and communities creates nations. However, courage at individual level is far more important to bring the change at macro level. However, individual efforts are required to bring the change.

At International level collective efforts of the different countries are required to the work a better place for living. The role

United Nations Security Council
can be enhanced by bringing
reforms in voting mechanism.
Furthermore, role of regional organization
can be enhanced. To counter
Islamophobia the of OIC
Organization of Islamic cooperation
can be enhanced by actively
advocating the rights of Muslims.
Hence, collective efforts are required.

In nutshell, for success,
for the efficiency, courage, determination,
honour and pride are key ingredients.
Without these one can not be
successful in any sphere of
life. Be shaplers, formless like
water adapting yourself according to
the situation (Bruce Lee). This depicts
be like water and ^{choose} show as the
necessary ingredients to fight against
the lethal winds that try to
hinder your ways to achieve success.
Moreover, failure to overcome challenges

~~can~~ make situation worse.

However, courage and hope
is important because there
is always a ray of light
even in the darkest of the
tunnel. Things that does not
kill you make you stronger."

(Friedrich Nietzsche)
