Who has defined the meaning of education in concrete terms.

There is not only one person who has fixed the meaning

sentence structure of work

of education. The meaning of education varies from person

That's not what the topic mean

to person, society to society,

and nation to nation. Those

people, societies and nations

who considered the education

as their first priority, they

are leading the world in

this era. Those nations who

thought education as a privilege,

they are waiting for the help

of others today. So this

inequality has changed the meaning

for anyone. So, everybody thinks

about the education in a very

limited view. For a student, the

meaning of education is to get good

grades; For a politician is to

get more popular votes; For a

leader, its meaning is to transform

the whole nation. For the poor

The meaning of education depend on the outcome. Can outcome of education be defined??

people, the meaning of education is a privilege; A woman sees the education as a gender discrimination facility. So different meanings are specified by different people. So these meanings also affects their lif lives positively or negatively. So some societies and nations have become innovative and creative and some nations are facin has been facing the problem of unemployment. The adverse effect of defining education in a concrete term is the curse of gender equality is still prevalent in the world. However, by providing equal access and free access to education different problems can be solved. They will also help to define education? in a more broad and universal way. TS?

The meanings of education are definable in concrete terms.

Every person defines education in its fixed way point. So his their

Contradictory
Sentences!

You can't say meaning of education is fixed because it is different for everyone

the meaning of education changes for everybody, every class, and every society. Those people who are poor and cannot afford it.

They consider the meaning of education is to get privilege.

However, there are many people in the world, who think

every person has a right to get education. So, these people

run different NGOs and collaborate with UN and governments to

provide equal access to education

for all all. The meaning of education for student is to get

good grades. Therefore, this shows that the meaning of education

is fixed for everyone.

Irrelevant

This is also the same argument as 3(b)

don't number the paragraphs

First, the meaning of education for students is to get high marks and good grades in their tests and exams. These students do not think about the creativity and innovation of

the society. This is because education system in ~~most~~ many developing countries is based on the system of getting good grades. So those students who get high marks and good grades in their classes, they are considered intelligent and hard working. For example, developing countries like Pakistan and India are following such a grade system which hinders the innovative capabilities of students. This shows that students consider the meaning of education is to get good grades in the exams.

In the same manner, the meaning of education for the poor people is a privilege. There are thousands of millions people who can-not afford two times meals a day. They do not ^{know} how they ^{will} get next day meal; that's way they

suppose

irrelevant

think education is a privilege which is only available to the rich people. The conditions of the poor people are worse in the developing countries.

For example: the developing country like Pakistan where multi dimensional poverty is approximately 40%, according to the World Bank. So, the poor people can not afford to provide education to their children. This shows that poor people consider education is a privilege for the rich people.

Similarly, The meaning of education for a politician is to get popular votes. They know that in this way they can get the sympathy of public. So, every politician talks on the problems of education.

But on the ground level, None

~~does not take any step to provide free education to all children. The politicians of developing countries participate in the conventions on education but they do not take any step in their country regarding the reforms of their education system. According to World Bank, Bangladesh only spend approximately 2.2 percent of its GDP, while UN recommends to invest almost 4 percent of GDP. This demonstrate that the meaning of education for a politician is to get popular votes.~~

In the same way, the meaning of education for a women is gender discrimination. Women have been facing gender discrimination in every society, every class and in every country. Unfortunately, women are also

gender discrimination for access to education. Many developed countries are trying to provide equal chance of education to their women, but they close their eyes on the matter of women in developing countries.

Many women in the developing countries are facing problems for their access to education.

For example, Afghanistan has shut down their doors for the education of women in their country. This elaborates that women thinks the meaning of education is gender discrimination.

The meaning of ^(education for) a woman is gender discrimination, but the meaning of education for a leader is to transform the nation. If someone look back at the history, he will find that every leader advise^s

his nation to get education at every cost. The global leaders know the worth of education. They themselves became leaders because they read books and get the education from every corner of the world.

A.S. Qaid-e-Azam said:

~~that~~ "Education is a matter of death and life for Pakistan."

He knew that Pakistan could make a progress only if it focuses on education. This shows that the meaning of education for a leader is to transform the nation.

Similarly, the meaning of education for a developed nation is to produce scientist, engineers, pilots and renowned scholars.

This is because, developed nations know the exact worth of education. Education is the basic need for them.

Developed nations know that if their governments provide education to the people then these people can not ~~change~~ only change their fate but they can also change the destiny of the whole nation. For example, United States of America spends more than 5 percent of GDP which is above the UN defined standards of education expenditures. This shows that ~~on~~ the meaning of education for developed nation is to produce productive nation.

In the same manner, the meaning of education in Islam is to provide education to their followers. Islam ~~on~~ has made it obligatory to acquire education. Islam has also ordered their follow to get education from anywhere and from every corner of the world. In Islam,

Date _____

Day **M T W T F S**

the status of a student is equal to a soldier. This means that education is as important as to protect one's land.

Islam has restricted its followers to get only education which can benefit to you and other people. Islam prohibits their followers from Black Magic.

Holy Prophet (P.B.U.H) said,

"Education is compulsory for every man and every woman."

Islam advises both the men & the women to get education. This tells us the importance of education in Islam.

As the meaning of education is fixed for different people in the world. so ~~their~~ effects in the same manner, the meanings of education also leave their impacts on people, society, and nation.

The first effect is that innovation

Date _____

& ~~privilege~~ ^{creativity} also becomes the privilege for the poor people.

It means that poor people are also competent and intelligent but they are illiterate; They can not afford expensive education

so they can not compete with the rich people. The students of good schools and universities

get opportunities to explore themselves so they invent and create new ideas and things.

"Education is an opportunity to upgrade yourself."

→ Continue from here
Redtom Bell

This demonstrate that innovation and creativity ~~has~~ also become a privilege for them.

Similarly, by defining the meaning of education in a concrete terms has also created an intolerant societies in different countries of the world. There are many societies and countries which do not

provide equal rights to their minority citizens. People treat them like they are aliens. This is the effect of the meaning of education. In some societies, rights are given to women but rights are not given to other religious minorities.

For example: United States of America, ~~the UK~~, France, Canada and many other developing countries talk on the rights of women but they do not provide religious liberty to both men and women in their countries. This shows that by defining the meaning of education in a concrete terms has created intolerant societies in the world.

Another the impact of the concrete meaning of education in developing countries is that the unemployment has become a major problem for them. As the meaning of education for them is a privilege so

politicians, government officials and states do not provide attention to the education system.

Resultantly, students are not well trained and skilled according to the demands of market. So the students of developing countries struggled to find a job in the market.

For example, In Pakistan, unemployment has reached to 7%, according to the Economic Survey of Pakistan 2022-2023.

This shows that unemployment is worse in developing countries due to defining the ^{meaning of} education in concrete terms.

In the same manner, the meaning of education for developed nation is to provide free education to all children; so these nations are progressing rapidly and continuously. Developed nations focus on the education of children.

These nations always introduced new innovations in their education system. Developed nations spend a significant amount on their education system. In this way, new scientist, engineers, and entrepreneurs produced in their countries. For example, the U.S, U.K, Japan, Germany and many other countries have world top universities and they also have world top business companies and market's share. This shows that developed nations are progressing rapidly because they focus on the education system.

In the same manner, ~~on~~ Many countries think education is not the right of education, so gender inequality prevails in their society. Many developed nations are now providing equal opportunity to get education to both the girls and boys. That's way, gender equality is improving in those countries day by day.

But there are many countries whose girls remain deprived of education right. So gender inequality prevails in that countries. These girls do not know their rights so they do not speak in front of male dominated society. For example, Afghanistan does not allow girls to get education. So he is at 146 ranking in gender equality index, according to the Global Gender Report 2023. This shows that gender equality is prevailing in these countries due to defining the meaning of education in a concrete terms.

By defining the meaning of education in a concrete terms affects the whole world both positively and negatively also. But following way forwards can help to promote the education in a more broad terms. The first is provide equal access to education to all children and humans

irrespective of any discrimination.

In this way, everybody ~~would~~ will be able to get education in every corner of the world. People would be able to get jobs and improve their socio economic condition and gender equality will also prevail in the world. For ~~an~~ example, Finland is a country in the world who is the number one in the world most happiest nation. It is also at the top of gender equality achievement index. This is because it has achieved 100 percent ~~gender equality~~ literacy in the world. This shows that by providing equal access to education to all children, the world can solve many its problems.

Secondly, ~~the~~ the meaning of education can be redefined if every state provides free education to their children. In this way, every child will be able to get education.

Date _____

Day **M T W T F S**

Education enables young children to participate in the development of their country. Many developed and developing nations also providing free access to education to all children. For example Pakistan is providing free education to their children from the age of 5-16 years old - According to the 25-A article of the constitution of Pakistan. This step helps Pakistan to improve its literacy rate. This shows that by providing free access to education, the meaning of education can be redefined.

Similarly, the meaning of education system can be redefined if ~~the~~ the education system is defined on the basis of innovation & ^{creative} ~~culture~~ culture promotion. Rotten culture should be discouraged in the education system.

This is because rotten culture does not allow students to think out of box. Developed countries should cooperate with the developing countries to upgrade their education system.

For example: Developed countries like U.S, Australia, China, UK, Israel, Finland and many other developed countries should contribute to provide education to all children in the world and help developing countries to upgrade their education system. This shows that discouraging rotten culture would help to upgrade the education system in the world.

In conclusion, the meaning of education ~~are~~ is discrete for different people but their context varies from people to people, nation to nation, and from society to society.

The meaning of education for developed nation is to produce scientist;
the meaning of education for a

sequence should be maintained

Date _____

Day M T W T F S

leader is to provide free education to all citizen in the country.

Similarly, the effects of ^{the} meaning of education also shows on the development of nations and people.

Some nations are more developed and economically strong as compared to other those countries which do not give value to education.

But by providing equal access to education to all children and by providing free education, the meaning of education can be redefined and ~~can~~ be promoted universally in the whole world.
