-

6- Conclusion.

Only a healthy population can be an asset of a country. Country's development depends on the healthy and effective population. It increases productivity of the country that leads to economic growth and the country moves in the direction of stability. Healthy population have intelligent minds to develop technological work or technologies. They doing business and creates the more jobs opportunities to eliminate the factor of unemployment.

"It is health that is the real wealth
And not pieces of gold and wealth"

Healthy population provides more intelligent brains that provides the skills to make the technology. If we go in the past, computers were developed for the ease of people as healthy population with the passes of time technology the Artificial Intelligence. without the healthy population with brilliant mind it is not possible at all.

Healthy populations leads to increase the productivity. Healthy people do their work more efficiently. If there are sick people they donot able to work

properly. The makeup of any population can influence the supply of labour and its productivity.

Resilience is an asset that helps individuals and communities to anticipate potential future threats or seize opportunities to protect and promote their health and wellbeing.

Healthy population becomes human capital and accelerates the economic growth they produce. Job opportunities it removes the employment factor, they improve the education system. It removes the factor of illiteracy. They take part in industrialization that leads to economy boost. So the healthy population leads to economic growth.

"Healthy population provides the opportunity to grow as a nation"

Healthy, Educated people have the ability to grow. Cop up the challenges. If the country goes on buses only people who are educated and intelligent minds lead the country in a white right direction without healthy population. It is not possible at all. Fresh minds are the leaders of the country.

Over population leads to unemployment and many other problems. when the people are educated and if the people were healthy over population will be reduced. when unemployment is reduced and country's economic growth is flourish.

"Overpopulation in various countries has become a serious threat to the health of people and a grave obstacle to any attempt to organise peace on this planet"

"Einstein"

Conclusion:
