country

Answer

7

Economy is the backbone of political system of a country

- Countries have strong economy have strong political systems, are free from corruption -
- Exports would be high imports minimum
- Productivity maximum
- China is well developed while example of undeveloped countries is Maldives and Pakistan
- Man power employment ratio high as compared to unemployed people - Benefiting country economy
- Soft power instead of hard power like China is soft power want peace instead of wars and disputes - Imposing on trade, and good affairs with other countries
- with other countries strong political agreements on trade, development of infrastructure, advertisement, health and productivity
- Main point is peace, peace is basic motif of economic stability
