Special CSS
Mock Exam (September 2023)

Batch # 045

No A

Name: Sadaghuil Hussain

Topic: Artificial Intelligence: its promise and perils.

Outline:

1. Introduction:

Artificial intelligence is being used to go more in various domains in the world. 21st century is the epoch of technological mind set. World should ^{be} ready for modern revolutions.

2. Rise of Artificial Intelligence.

3. What are the promises of the Artificial Intelligence

- (a) AI may help in enhancing the knowledge
- (b) AI can reduce extra work force
- (c) AI can boost ability of humans
- (d) It provides social and political awareness
- (e) AI helps in economic sustainability
- (f) It does task in least time
- (g) AI gives unbiased solutions

4. The perils of Artificial Intelligence

- (a) Excessive use may make human dominant
- (b) It may cause of unemployment
- (c) Excessive usage of AI may promote anxiety and depression
- (d) AI does not know the rules of ethics
- (e) This technology can be used for surveillances
- (f) It may promote the culture of war

5. How to deal with these perils.

- (a) least excess of AI
- (b) promote the human activities more
- (c) Make International rules for this technology

6. Conclusion:

Sir Syed Ahmed Khan once said, "Adopt the Modern culture". That means the nation should adopt contemporary things which may help in development. 21st century is the ~~technological~~ ^{era} ~~mindset~~ ^{epoch} of technological mindset. World should get advantages from the revolution of technology. Artificial Intelligence is the advanced technology of the 21st century.

With this technology, common man gets various benefits and learns more. Every developing country should adopt this technology. ~~The~~ Pakistan has been facing various problems in ^{various} many domains; these problems can be solved with this technology.

~~This~~ Artificial Intelligence gives advantages but also produces perils for the countries. Artificial Intelligence can improve excess of knowledge and make people more creative. It can also promote

?

-the social, political and economic awareness. Artificial Intelligence may give extra efforts in education development. With this technology, a child can be more creative. ~~Artificial~~ Artificial Intelligence also produces some dangers for the human beings. It may promote the culture of Robots. As per report, after few a few decades humans may disappear from the planet earth. Humans should delimit the usages of Artificial Intelligence at once.

The emergence of various technologies such as: ChatGPT, Social Media, VR Technology, META technology etc, can be seen in 21st century. This is the epoch of technological mind set. The Artificial Intelligence (AI) is also a advanced technology of 21st century. It may improve the human lifestyle with its advanced ideas. It may help in thinking, education system, and various activities. After the rise of Artificial Intelligence, the thinking power of humans has been changed. Hence, the power of Artificial-

Intelligence.

~~No doubt~~, Artificial Intelligence gives more excess do gain more knowledge in the world. World has accepted the hegemony of this technology with release of knowledge. World gets updated with the technology. If a country want to know the current circumstances of the other countries, it should press only one button to know the exact situation of those countries. This is only because of advanced technology. In that case, Artificial Intelligence is the major source of knowledge.

Artificial Intelligence promotes the culture of less workforce. It reduces the extra humans from the works. It gives more strength with less workforce. As per report, the capacity of Artificial Intelligence is equal to more than 1 thousand workforce. Therefore, Artificial Intelligence can be used instead of extra workforce.

Artificial Intelligence enhancing the ability

→ and power of human being. Human can learn more from this technology. This technology may accumulate the evidences that how human's mind is working. As per report, Artificial Intelligence can do a work faster than human. The speed of Artificial Intelligence such as: ChatGPT, is 10 million times faster than humans. Hence, Human beings can enhance his ability and inner power from this advanced technology.

Social development can be promoted through the advanced technology. With the algorithms, the maintainance of peace, law and order, and sustainability of environmental activities can be promoted. Artificial Intelligence may also helps in political awareness. Artificial Intelligence, produces literate mindsets in the society. Humans can learn more from this technology. In that case, without education the sustainable social and political development is out of question.

~~Developing countries have been facing~~

various problems such as: educational, political, constitutional, and economical problems. For Pakistan, economical problem is the major of all problem. Artificial Intelligence may reduce the peril of economic declination. This technology gives various options with regard economic model. A country can easily adopt an economic model. For Pakistan economy is the major of all problems. Pakistan should earn billions of dollars with the advanced technology. Hence, Artificial Intelligence may ease the danger of economy.

Humans can easily get advantages from Artificial Intelligence. Artificial Intelligence can be used for problem solution. It may reduce the danger of bad relations with others. It gives unbiased solutions of the problems. It may use for international problems. Human can solve the mysteries with the help of Artificial Intelligence. It gives impartial solutions of any problems in the world. Hence, A major problem can be solved with the help of this technology.

Artificial Intelligence imposes the dangers for human beings. Human ~~become~~ would become dormant, if he/she use it excessively. Excessive use of artificial technologies may ~~produce~~ ~~to~~ the habits of laziness. It snatches the capacity of thinking capabilities and make humans more inactive physically and mentally. As per report, Due to excessive use of social media, many people are unable to think critically. Therefore, ~~it~~ it poses the danger zones for human beings.

Artificial Intelligence is responsible for unemployment. Many owners of the various company prefer the accurate work rather than ~~inaccurate~~ inaccurate work. The owners want least workforce environment. As per report, 10 million people would lose their respective jobs due to rise of Artificial Intelligence. ~~Therefore~~ Unemployment is the major issue in various countries in the world. Similarly, Artificial Intelligence would promote the culture of unemployment.

However, this technology generate anxiety and depression among the youth. Excessive usage of social media, chat GPT, and other technological instruments may produce anxiety among humans. There is ~~plthora~~ plethora of scientific evidences ~~the~~ the fact that there is link between excessive usage of technology and anxiety. As per report, the advanced technology is major responsible for sleeping disorder. Therefore, Artificial Intelligence is the major contributor of anxiety, depression, and ~~and~~ sleeping disorder.

Similarly, Artificial Intelligence has no emotions. It can not feel or react with reference of emotions. It may promote the unethical environments in the world. Recently, Microsoft produced man-made algorithm. It spreaded unethical words for the world leaders. This act actually the evidence of how dangerous this technology is.

last but not least, Artificial Intelligence can be used for war purpose and can be used for spy within other countries. It may create the bad environment. There is ^{International} anarchic system in ~~International~~ the world. This technology can be used for hampers the development of other countries. Humans ~~can be~~ ^{should} aware of the negative impacts of this technology. It may start the nuclear war within the world. Therefore, this technology may promote the war.

These are many advantages and disadvantages of Artificial Intelligence. Humans should avoid the disadvantages and promote the benefits of this technology. There is dire need to introduce limited rules for usage of this technology. This will help in controlled and limited use of Artificial Intelligence. Less excess of Artificial Intelligence should produce sustain environment.

Secondly, Humans should promote human activity rather than artificial activity.

Humans should learn from it. However, humans should not fully rely on this technology. Artificial Intelligence replaced the humans with its accurate works. In painting, education, languages, and arts, technology does perfect work than humans. It may cause of unemployment of humans in various department. Humans should give ~~sympathy~~ ^{preference} to humans rather than machines. Humans need some sources for livelihood. Therefore, world need to do work on Artificial Intelligence's rules.

To sum up, role of Artificial Intelligence in this modern world is crucial. It gives benefits similarly, produces dangers for human beings. This era needs more creative and technological mindsets. ~~This~~ ^{It} may cause of problems and also gives solution of the problems. It promotes the awareness of various domains in the world. World should adopt the technological revolution and also ~~it~~ gives some limited rules and regulation for this ~~technology~~.

(10)

(September 2023)
(Rough Works) (Essay Model)

→ Artificial intelligence: its promise and perils. (✓)
Background M.T S.F

→ How Artificial intelligence ^{does} beneficial for the world. (✓)

- a) Knowledge - enhance
- b) Work force - Boost up.
- c) Intelligence and ability - (enhance)
- d) ^{unbiased} Social and political awareness - (Information Technology)
- e)  Solution - (problems)
- f) Creativity - (less time)
- g) ~~Helps in economy~~ ^{Helps in economy} (Economic Model)

→ The perils of (AI) (✓)

- a) InActive (dormant)
- b) Unemployment
- c) Anxiety and depression
- d) Unethical work
- e) Surveillance
- f) Perils of wars

→ How these perils can be cured. codes

- a) limited — (usage of AI) (rules) (framework)
- b) ^{Domestic} ~~Rely on~~ human activities (Environmental) (political) (ethics)
- c) Used for ~~peace~~ ^{educated} no purpose. (Technological revolution)
