Artificial intelligence: its promise and perils.

Outline

1. Introduction
   a. Development of Artificial intelligence
   b. Evolution of Artificial intelligence
   c. Thesis statement

2. Promises of Artificial Intelligence
   a. Result in decreased human workforce
   b. Better manipulation of data
   c. Generation of Artificial Intelligence powered human replicas
   d. Gathering efficiency of data relevant to education
   e. Collection of future data with respect to present data
   f. Reduction in task fulfillment time
   g. Human behaviour replica for human friendly interaction

3. Perils of Artificial Intelligence
   a. Increased Unemployment
   b. Burden on job market
   c. Deepfake videos resulting in harassment

Date:_____

d. Loss in human productivity

e. Manipulation of data in voting

f. ~~less~~ low quality of product

g. Autonomous system works for its own benefit

4. Solution to perils of Artificial Intelligence

a. Monitoring of data

b. Apply Artificial intelligence to specific industries

5. Conclusion
